Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

REGISTER OF AVAILABLE CAPACITY

PREFACE TO REGISTER

Section 49 of the *International Air Services Commission Act 1992* requires an up to date register of all available capacity, under Australia's air services agreements and arrangements, to be kept and made available for inspection. The Register is maintained by the Department of Infrastructure and Regional Development ('the Department').

This copy of the Register is made available to the general public but it is not authoritative. Persons seeking to rely on the contents of the Register should consult the original Register maintained by the Department.

Clarification of any conditions relating to the capacity, aircraft substitution formulae or wording used in the entries in the Register may be had by reference to the texts of air services agreements and arrangements held in the Data-Room established by the Department. Access to the Data-Room is available only to potential applicants before the International Air Services Commission following signature of a confidentiality undertaking by them. This is because some of the agreements and arrangements contain commercial-in-confidence or confidential material. Notification that a company is a potential applicant before the International Air Services Commission is provided by the Commission to the Department.

In examining the Register, it should be noted that:

- references to frequencies of flights mean round-trips unless otherwise specified;
- points which can be served in the foreign countries are as set out in Australia's bilateral air services arrangements with those countries (this information is available from consulting the documents in the Data-Room);
- in determining traffic rights which are available on routes between second and third countries, reference should be made to the terms of Australia's arrangements with both countries (this information is available in the Data-Room);
- while most of Australia's air services arrangements with foreign countries allow for the designation of more than one Australian airline (multiple designation), some arrangements allow designation of one Australian airline only (single designation). The Register entries for single designation routes include a note to this effect;
- the Register indicates where a designated Australian airline is operating (or may soon operate) on a single designation route, as this would prevent another Australian airline from operating on the route. On some single designation routes there may be a currently designated Australian airline which does not have a capacity allocation. This would not prevent another Australian airline receiving an allocation of capacity. However, intending applicants should make inquiries of the Department regarding current designations, particularly on single designation routes, and the steps which may need to be taken before a new designation is made and operations may commence;
- where Australia's air services arrangements allow for multiple designation, the relevant Register entries include a note to this effect; and

REGISTER OF AVAILABLE CAPACITY

- in several of Australia's air services arrangements which include aircraft substitution formulae, some latitude may be allowed for airlines to exceed marginally the capacity entitlement (this information is available in the Data-Room).

The information contained in this Register is current at the date indicated for each entry.

REGISTER OF AVAILABLE CAPACITY

The following list sets out the countries with which Australia has air services agreements or arrangements as at 9 January 2018. Under some of these agreements or arrangements, Australia does not currently have capacity available for allocation. Capacity which is available for allocation is set out in the individual country entries which follow.

REGISTER OF AVAILABLE CAPACITY

BOTSWANA

DESIGNATION STATUS: MULTIPLE

CODE SHARE SERVICES

The nominated airlines of Australia have the right to enter into code share arrangements on routes to/from Botswana with any other airline, including other Australian airlines, those of Botswana or of third parties.

The arrangements do not provide capacity for own-operated services.

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was created on **11 December 2014**.

REGISTER OF AVAILABLE CAPACITY

BRAZIL

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

Combination Passenger and Cargo services: Fourteen (14) weekly frequencies

All Cargo Services: Seven (7) weekly frequencies

Some of these frequencies may not be used for services between Guarulhos International Airport and points in Australia until the regulatory restraints in place in Brazil as of 8 July 2008, related to infrastructure at that airport are removed. This restriction applies to seven of the fourteen combination passenger and cargo services and four of the seven all cargo services.

CODE SHARING

A designated airline of Australia may enter into code-sharing arrangements, whether as the operating airline (i.e. to carry partner airline(s)'s code on its own services) or marketing airline (i.e. to put its code on partner airline(s)'s services), in respect of passenger, combination and/or cargo air services with other designated Australian airlines, designated Brazilian airline(s) or with third country airlines.

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **24 July 2008**.

REGISTER OF AVAILABLE CAPACITY

BRUNEI DARUSSALAM

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

PASSENGER CAPACITY ENTITLEMENTS

To/from Sydney, Melbourne, Brisbane and Perth:

27 services per week

To/from points other than Sydney, Melbourne, Brisbane and Perth:

Unrestricted capacity, frequency and aircraft type.

DEDICATED CARGO CAPACITY ENTITLEMENTS

Designated Australian airline(s) may determine the frequency of service, capacity and aircraft type to be operated on the specified routes.

CO-OPERATIVE MARKETING ARRANGEMENTS

In operating or holding out the agreed passenger and cargo services on the specified routes, the designated airlines of Australia, whether as the operating airline or the non-operating (marketing) airline, may enter into co-operative marketing arrangements such as blocked space or code sharing with any other airline(s).

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **28 October 2015**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

BURMA

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

Passenger

To/from Yangon (Rangoon), a total of seven (7) frequencies per week.

Unrestricted to/from all other points in Burma other than Yangon (Rangoon).

Freight

The designated airline(s) of Australia may operate dedicated cargo services without restriction on capacity, frequency or aircraft type.

Codeshare:

The designated airline(s) of Australia may code share on any airline as the marketing airline, including third country airlines, with no restriction on capacity.

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **29 October 2015**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

CAMBODIA

DESIGNATION STATUS: Multiple

AVAILABLE CAPACITY:

COMBINATION PASSENGER/CARGO CAPACITY:

- (a) 7 frequencies per week with any aircraft type to/from all points in Australia other than Sydney, Melbourne, Brisbane and Perth; and
- (b) 7 frequencies per week with any aircraft type to/from Sydney, Melbourne, Brisbane and Perth; and
- (c) 7 frequencies per week with any aircraft type to/from Sydney, Melbourne, Brisbane and Perth provided the service operates on both the inward and outward journey via a point that is not Sydney, Melbourne, Brisbane and Perth.

DEDICATED CARGO CAPACITY:

5 frequencies per week with any aircraft type.

COOPERATIVE MARKETING CAPACITY

A designated airline of Australia may enter into code share arrangements, whether as the operating or marketing airline, with a designated airline of Cambodia, a designated airline of Australia and/or an airline of a third country.

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on 23 February 2017.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

CANADA

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

OWN-AIRCRAFT PASSENGER/COMBINATION SERVICES:

7908 seats per week in each direction to/from Sydney, Melbourne (including Avalon), Brisbane and Perth.

Unrestricted capacity to/from all other points in Australia.

Designated airline(s) may exercise full fifth freedom traffic rights at the following intermediate points: Honolulu, Fiji, Tahiti, San Francisco and a point to be agreed.

ALL-CARGO SERVICES:

The designated airline(s) may determine the frequency and aircraft type to be operated.

This Register entry was last amended on **30 June 1999**.

REGISTER OF AVAILABLE CAPACITY

FRANCE

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

Route 1

3.0 units of capacity per week in each direction.

The designated airlines of Australia may enter into arrangements with other airlines, including airlines of third countries, to undertake services through code share, blocked space or other joint venture arrangements - currently there is no capacity available..

Route 2

Passenger services:

Seven (7) weekly frequencies in each direction using any aircraft type.

Cargo services:

The designated airlines of Australia may freely determine the frequency of service, capacity and aircraft type to be operated.

Route 3

Passenger services:

1612 seats per week in each direction

Cargo services:

Two all-cargo services per week with a capacity of up to 28 tonnes.

Further information about such arrangements can be obtained from the Department of Infrastructure and Regional Development.

REGISTER OF AVAILABLE CAPACITY

FRANCE (cont.)

Aircraft substitution formula for Route 1:*

Aircraft Seat Capacity Coefficients

400 seats and above	1.0
360 - 399 seats	0.9
320 - 359 seats	0.8
280 - 319 seats	0.7
240 - 279 seats	0.6
200 - 239 seats	0.5
150 - 199 seats	0.4
aircraft below 150 seats	0.25

Note * When a B747 Combi aircraft is used by a designated airline, it will use the equivalent of one unit of capacity.

If the application of the foregoing ratios for each aircraft type will result in the total capacity entitlements for the designated airlines of Australia being exceeded, such excess will be permitted provided that it is no more than 0.25 units of capacity.

This Register entry was last amended on **8 September 2015**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

GERMANY

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

PASSENGER SERVICES

25 frequencies per week with any aircraft type

This Register entry was created on **17 December 2012**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

GREECE

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

PASSENGER CAPACITY

7 services per week in each direction using any type of aircraft.

DEDICATED CARGO CAPACITY

Unrestricted frequencies and aircraft capacity using any aircraft type.

CODE SHARING

In addition, designated airlines may enter into arrangements with any airline, including airlines of Australia and of a third country, to carry out agreed services over the whole or any part of the route through code share, blocked space and/or other cooperative arrangements. Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

The volume of capacity or service frequencies which may be held out and sold by designated airlines of Australia, when code sharing as the non-operating airline, is not limited.

This Register entry was last amended on **27 June 2017**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

HONG KONG

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

*Passenger services between Sydney, Melbourne, Brisbane and Perth and Hong Kong**

35 frequencies per week

Passenger services between all points in Australia other than Sydney, Melbourne, Brisbane and Perth and Hong Kong

There is no limit on the number of frequencies that may be operated.

*All-cargo services between Sydney, Melbourne, Brisbane and Perth and Hong Kong**

One (1) frequency per week

All-cargo services between all points in Australia other than Sydney, Melbourne, Brisbane and Perth and Hong Kong

There is no limit on the number of frequencies that may be operated.

***Designated airlines of Australia may at their discretion freely convert and reconvert capacity for the operation of passenger services and all-cargo services between Hong Kong and Sydney, Melbourne, Brisbane and Perth on the basis of one passenger frequency for one all-cargo frequency or vice versa.**

CAPACITY FOR THIRD COUNTRY OPERATIONS:

PASSENGER CAPACITY

Fifth freedom rights are available for a maximum of 50% of the capacity of the aircraft operated, or up to 200 passengers per flight, whichever is higher.

Capacity may be used via points in Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand to Hong Kong on up to 7 round trip frequencies per week on each city pair.

Capacity may be used beyond Hong Kong to points in Thailand, Singapore, Japan, Republic of Korea and one point in Europe and one point in the United Kingdom on up to 8 round trip frequencies in total per week.

(continued on next page)

REGISTER OF AVAILABLE CAPACITY

HONG KONG (continued)

Of these, if a European point is selected, up to 3 round trip frequencies per week may be operated. The European point may be selected from points in Germany, France, Scandinavia, Italy, the Netherlands or Switzerland. Currently there are 7 round trip frequencies per week available beyond Hong Kong to the United Kingdom.

ALL-CARGO CAPACITY

All-cargo services may be operated between Australia and Hong Kong and optionally via permitted intermediate points. No beyond operations are permitted.

No cargo traffic may be uplifted at an intermediate point and discharged at a point in territory of the other country. However, designated airlines may uplift traffic at points in their territory for discharge at an intermediate point.

CODE SHARE OPERATIONS

A designated airline of Australia may, subject to conditions, enter into code-share arrangements, whether as the operating or marketing airline, in respect of passenger and freighter air services with: a designated airline(s) of Australia; an airline(s) of Hong Kong; and an airline(s) of a third country or countries. Further information about the conditions applying to those entitlements may be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **17 June 2016**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

HUNGARY

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

PASSENGER CAPACITY

Unrestricted frequency, capacity and aircraft type for services to and from all points in Australia other than Sydney, Melbourne Brisbane, and Perth

For services to and from Sydney, Melbourne Brisbane, and Perth:

A total of seven (7) services each way each week with any aircraft type

DEDICATED CARGO CAPACITY

The designated airline(s) may determine the capacity, frequency and aircraft type to be operated.

CODE SHARING

The designated airlines of Australia have the right, over all or part of their route, to enter into code share, blocked space or other cooperative marketing arrangements, as the marketing and/or operating airlines with any other airline, including airlines of the same side and of a third country. Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **19 December 2006**.

REGISTER OF AVAILABLE CAPACITY

ICELAND

DESIGNATION STATUS: MULTIPLE

CODE SHARE SERVICES

The designated airlines of Australia have the right, on all or part of their routes, to enter into code share, blocked space or other cooperative marketing arrangements, as the marketing airline, with any other airline, including other Australian airlines or of third parties.

The arrangements do not provide for capacity for own-operated services.

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **6 June 2012**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

INDIA

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

Passenger

6500 seats to and from Mumbai, New Delhi, Kolkata, Chennai, Bangalore and Hyderabad.

Note: In the event that an Australian airline or airlines wish to operate capacity which would result in the total capacity available above being exceeded by an amount of 5% of the total available, the aeronautical authorities may approve such minor variation.

CODE SHARE:

The designated airline(s) of Australia may code share on any airline, including third country airlines, with no restriction on capacity.

Freight

The designated airline(s) of Australia may operate dedicated cargo services on any route with unlimited frequencies and any aircraft type.

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **13 March 2013**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

INDONESIA

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

(a) Unrestricted capacity between points in Australia, except Sydney, Melbourne (including Avalon), Brisbane and Perth.

(b) 3092 seats available per week in each direction to and from Sydney, Melbourne (including Avalon), Brisbane and Perth.

(c) an additional 2 500 seats per week in each direction to Sydney, Melbourne (including Avalon), Brisbane and Perth, provided such services operate via or beyond to a point in Australia other than Sydney, Melbourne (including Avalon), Brisbane and Perth.

Note: In the event that an Australian airline or airlines wish to operate capacity that would result in the total capacity available in paragraph (b) above, being exceeded by an amount of 150 seats or less, the aeronautical authorities will permit such minor variations.

ALL CARGO CAPACITY:

There is no restriction on the operation of all-cargo services, with any type of aircraft, between Jakarta, Medan, Surabaya, Denpasar and Makassar and any points in Australia. In operating services between other points in Indonesia and points in Australia, Australia's designated airline(s) may operate three (3) all cargo services per week in each direction with any aircraft type.

COOPERATIVE MARKETING CAPACITY:

A designated airline of Australia may enter into code-share, blocked space or other cooperative marketing arrangements, as the marketing and/or operating airline with another Australian airline or airlines, with an Indonesian airline or airlines, or with an airline or airlines of a third country.

Note: A number of conditions apply to cooperative marketing operations. Airlines intending to apply for this capacity should seek further information from the Department of Infrastructure and Regional Development.

CAPACITY FOR SERVICES BEYOND INDONESIA TO THIRD COUNTRIES:

PASSENGER/COMBINATION CAPACITY

11 frequencies per week utilising up to 4492 seats weekly beyond Jakarta and two points in Indonesia west of Denpasar to Singapore, points in Malaysia and a point in Thailand.

Note: Traffic right restrictions apply to services beyond Indonesia. Intending applicants should seek advice on this matter from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **22 September 2017**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

IRELAND

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

Passenger services between Sydney, Melbourne, Brisbane and Perth and Ireland

Seven (7) services per week with any aircraft type

Passenger services between all points in Australia other than Sydney, Melbourne, Brisbane and Perth and Ireland

There is no limit on the number of services that may be operated.

All-cargo services:

There is no limit on the number of services that may be operated.

COOPERATIVE MARKETING ARRANGEMENTS

A designated airline of Australia can, over all or part of the specified route, enter into code share, blocked space or other cooperative marketing arrangements, as the marketing and/or operating airline, with any other airline, including other designated airlines of Australia and of third parties. Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **8 August 2005**.

REGISTER OF AVAILABLE CAPACITY

ISRAEL

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

PASSENGER CAPACITY

A total of seven (7) services each way per week with any aircraft type to/from Sydney, Melbourne, Brisbane and Perth; and

Unrestricted capacity, frequency and aircraft type to/from all points in Australia other than Sydney, Melbourne, Brisbane and Perth.

DEDICATED CARGO CAPACITY

A total of seven (7) frequencies each way per week using any aircraft type.

COOPERATIVE MARKETING ARRANGEMENTS

A designated airline of Australia, whether as the operating or non-operating airline, may enter into co-operative marketing arrangements such as blocked space or code sharing with:

- (a) any airline or airlines of Australia or Israel;
- (b) any airline or airlines of a third country.

The volume of capacity or service frequencies which may be held out and sold by designated airlines of Australia, when code sharing as the non-operating airline, is not limited.

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was created on **8 August 2017**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

ITALY

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

PASSENGER SERVICES:

7 frequencies per week with any type of aircraft

CARGO SERVICES:

7 frequencies per week with any type of aircraft

CODE SHARE ARRANGEMENTS

A designated airline of Australia may enter into codes share, blocked space or other cooperative marketing arrangements, as the operating or non-operating airline, with:

- a) any airline or airlines of Australia or Italy;
- b) any airline or airlines of a third country; and
- c) any surface (land and maritime) transport provider.

The designated airlines of Australia when entering into code share arrangements with an airline or airlines of Italy, may hold out for sale unlimited number of seats in total in each direction.

Further to the capacity provided above, the designated airlines of Australia when entering into code share arrangements with an airline or airlines of a third country, may hold out for sale up to 1,700 seats per week in total in each direction on an annual average basis.

Currently, 100 seats are available to code share on third country airline(s).

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **4 September 2017**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

JAPAN

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

Unlimited frequencies and slots for both passenger and/or all-cargo services between any points in Australia and any points in Japan with the exception of the following:

There is no capacity available to operate to/from Haneda Airport.

Note: With respect to Haneda Airport, potential applicants should contact the Department of Infrastructure and Regional Development regarding their specific proposals.

Fifth freedom traffic rights on services to/from Narita Airport:

Fifth-freedom traffic rights for combination passenger/cargo services are exercisable at certain intermediate and beyond points. In exercising these traffic rights, designated airlines of Australia are restricted to seventy-nine (79.0) units of capacity per week. The Department of Infrastructure and Regional Development can be contacted for further details.

CODE SHARING

The designated airlines of Australia may enter into code-sharing services on the specified routes with a designated airline or airlines of Australia, a designated airline or airlines of Japan or with an airline or airlines of a third country subject to approvals of the aeronautical authorities of both countries.

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

Aircraft substitution formula:

Aircraft type & frequency	Units of capacity
One A380 frequency	2.5 units
One B747 frequency	2.0 units
One DC10/MD11/A330/B777/A340/A350 frequency	1.5 unit
One B767-300 frequency	1.2 unit
One B767-200/A320/B737/B787/B757 frequency	1.0 unit

This Register entry was last amended on **16 December 2014**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

JORDAN

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

Passenger services:

Unrestricted frequencies with any type of aircraft to/from points in Australia other than Sydney, Melbourne (including Avalon), Brisbane and Perth;

Seven (7) frequencies with any aircraft type to/from Sydney, Melbourne (including Avalon), Brisbane and Perth; and

An additional seven (7) weekly frequencies with any aircraft type to/from Sydney, Melbourne (including Avalon), Brisbane and Perth provided the service operates through or beyond a point in Australia other than Sydney, Melbourne (including Avalon), Brisbane and Perth.

Freight services:

In operating dedicated cargo services on the routes specified, the designated Australian airline(s) may exercise unrestricted frequencies and capacity.

CODE SHARING ARRANGEMENT

The airlines of Australia will have the right to enter into code share, blocked space or other cooperative marketing arrangements, as the marketing and/or operating airline, with any other airline, including other Australian airlines and of third parties. Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **17 December 2012**.

REGISTER OF AVAILABLE CAPACITY

KENYA

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

PASSENGER SERVICES

Seven frequencies per week to/from any combination of Brisbane, Melbourne, Perth and Sydney.

To/from points other than Brisbane, Melbourne, Perth and Sydney

Airlines may determine the frequency of service, capacity and aircraft type to be operated.

CARGO SERVICES

In operating dedicated cargo services airlines may determine the frequency, capacity, and aircraft type to be operated.

COOPERATIVE MARKETING ARRANGEMENTS

In offering code share services with any other airline as a marketing carrier, airlines are entitled to exercise unrestricted traffic rights with no capacity limitations, provided that the operating airline has the appropriate underlying route, traffic and capacity rights.

Further information about such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **30 June 2008**.

REGISTER OF AVAILABLE CAPACITY

KIRIBATI

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

Passenger services:

A total of seven (7) frequencies with any aircraft type to/from Sydney, Melbourne, Brisbane and Perth; and

Unrestricted capacity, frequency and aircraft to/from all points in Australia other than Sydney, Melbourne, Brisbane and Perth;

Freight services:

In operating dedicated cargo services on the routes specified, the designated Australian airline(s) may determine the capacity, frequency and aircraft type to be operated.

CODE SHARING ARRANGEMENT

The airlines of Australia shall have the right to enter into code share, blocked space or other cooperative marketing arrangements, as the marketing and/or operating airline, with any other airline, including other Australian airlines and of third parties. Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was created on **27 June 2017**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

KOREA

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

PASSENGER SERVICES

(i) unrestricted capacity, frequency and aircraft type to/from all points in Australia other than Sydney, Melbourne, Brisbane and Perth

(ii) to/from Sydney, Melbourne, Brisbane and Perth:

7000 seats each way per week

12 months after the date on which the designated airlines of either Australia or Korea fully utilize the available capacity entitlements of 8500 seats, the capacity entitlement for the airlines of both countries will increase by a further 1000 seats to a total of 9500 seats.

If in operating the agreed services, the total capacity of the designated airline or airlines of Australia will be exceeded such excess will be permitted provided it is not more than 120 seats.

DEDICATED FREIGHT

The designated airline may determine the frequency, capacity, and aircraft type to be operated on the route for dedicated freight services.

COOPERATIVE MARKETING ARRANGEMENTS

The designated airline(s) of Australia may, subject to certain conditions, enter into cooperative marketing arrangements such as blocked space, code sharing, or leasing arrangements, whether as the operating airline(s) or the marketing airline(s), in respect of passenger, combination and/or cargo air services with airline(s) of Australia; (an) airline(s) of Korea; and (an) airline(s) of any third country or countries.

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **21 March 2014**.

REGISTER OF AVAILABLE CAPACITY

KUWAIT

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

Passenger

To/from Sydney, Melbourne, Brisbane and Perth, a total of seven (7) frequencies per week.

FORMER YUGOSLAV REPUBLIC OF MACEDONIA

DESIGNATION STATUS: MULTIPLE

CODE SHARE SERVICES

The designated airlines of Australia have the right, on all or part of their routes, to enter into code share, blocked space or other cooperative marketing arrangements, as the marketing airline, with any other airline, including other Australian airlines or of third parties.

The arrangements do not provide for capacity for own-operated services.

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **6 June 2012**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

MALAYSIA

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

COMBINATION PASSENGER AND CARGO CAPACITY:

- (i) unrestricted capacity, frequency and aircraft type to and from all points in Australia other than Sydney, Melbourne, Brisbane, and Perth; and
- (ii) 42 100 seats each way each week to and from Sydney, Melbourne, Brisbane and Perth.

DEDICATED CARGO CAPACITY:

In operating dedicated cargo services on the specified cargo route, the designated airline or airlines of Australia may determine the frequency of service, capacity and aircraft type to be operated.

COOPERATIVE MARKETING CAPACITY

A designated airline of Australia may enter into code sharing arrangements with another Australian airline or airlines, with a Malaysian airline or airlines or with an airline or airlines of a third country.

Capacity offered by an Australian designated airline as the non-operating airline on services operated by airlines of another country will not be counted against any capacity entitlements of the Contracting Party designating the non-operating airline.

Note: A number of conditions apply to cooperative marketing operations. Airlines intending to apply for this capacity should seek further information from the Department of Infrastructure, Regional Development and Cities.

This Register entry was last amended on **9 January 2018**.

Department of Infrastructure, Regional Development and Cities

REGISTER OF AVAILABLE CAPACITY

MALTA

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

The Australian designated airline(s) will be entitled in total to operate on their specified route in the Annex to the Agreement three (3) frequencies per week to/from Sydney, Melbourne, Brisbane and Perth with any aircraft having a capacity up to that of a B747 aircraft, provided that the total weekly seat capacity sold for Malta uplift/discharge traffic:

- (a) on the section of the route between Australia and Malta; and
- (b) on the section of the route between Malta and points beyond;

will be limited on each section to the volume of capacity authorized for the designated airline(s) of Malta into and out of Australia.

There is unrestricted capacity, frequency and aircraft type, for both passenger and cargo services, to/from all points in Australia other than Sydney, Melbourne, Brisbane and Perth.

COOPERATIVE SERVICE ARRANGEMENTS

The designated airlines of Australia may enter into code sharing arrangements with any other airlines, including airlines of third countries. Capacity operated as the marketing airline does not count against the capacity outlined above. Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **18 July 2017**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

MAURITIUS

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY:

PASSENGER SERVICES

Seven frequencies per week to and from Sydney, Melbourne, Brisbane and Perth

Regional Package entitlements

Unrestricted capacity is available for international air services between Mauritius and Australian international airports other than Sydney, Melbourne, Brisbane and Perth.

FREIGHTER SERVICES:

In operating dedicated cargo services airlines may determine the frequency, capacity, and aircraft type to be operated.

COOPERATIVE MARKETING ARRANGEMENTS

In operating or offering the agreed services any segment(s) of the specified routes, any Australian designated airline(s) may enter into code sharing arrangements, as a marketing and/or operating airline, with an airline or airlines of Australia, an airline or airlines of Mauritius and an airline or airlines of a third country.

Capacity offered by an Australian airline, as the marketing airline, will not be counted against capacity entitlements. However, if the marketing airline uses the services of an airline of a third country, the designated airline may offer up to 500 seats per week.

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

This Register entry was last amended on **26 May 2008**.

Department of Infrastructure and Regional Development

REGISTER OF AVAILABLE CAPACITY

THAILAND

DESIGNATION STATUS: MULTIPLE

AVAILABLE CAPACITY*:

** New capacity entitlements were negotiated on 7 November 2012. These will not come into effect until the domestic processes of each country are completed. Airlines seeking to operate capacity under these arrangements should contact the Department of Infrastructure and Regional Development.*

PASSENGER CAPACITY

The equivalent of 9.4 B747 weekly services.

In the event that the airlines of Australia wish to operate capacity which would result in the total capacity available to all airlines of Australia being exceeded by an amount of 0.3 B747-400 equivalent or less, the aeronautical authorities will permit such minor variations.

CARGO CAPACITY

The designated airline(s) of Australia can operate all cargo services without limitation on the capacity/frequency or type of aircraft on their specified route schedule.

CODE SHARE SERVICES

The designated airlines of Australia may enter into code sharing arrangements with any other airlines provided that airline(s) has the appropriate route and traffic rights.

Further information about the conditions applying to such arrangements can be obtained from the Department of Infrastructure and Regional Development.

Third Party Code Share

In addition to the above available capacity, and bilateral code share capacity available, the capacity available for use under third country code share is:

Up to the following limits per week in each direction for all Australian carriers:

7 services in each direction.

(continued on next page)

REGISTER OF AVAILABLE CAPACITY

THAILAND (continued.)

In addition to the above weekly code share services, any capacity [listed under "Available Capacity" above and not being code share capacity or cargo capacity] which is not operated may be converted into available additional code share services on the basis of one unused B747 equivalent service weekly in each direction equals one third party code share frequency weekly in each direction.

Aircraft substitution formula:

Aircraft type B747 equivalent
