Summary of Analysis of Assessment Criteria

This application was assessed by the Department as value with relevant money

Economic Benefit	Disadvantage	Partnerships	Viability and Sustainability	Total Assessment Criteria Score
5/5	3/5	5/5	3/5	26/30

National Stronger Regions Fund - Round One

Project and Assessment Summary NSRF000149

Red = 1 and 2; Green = 3, 4 and 5

Note: The score for Economic Benefit is multiplied by 3 in the Total Assessment Criteria Score to account for the weighting of the Economic Benefits Criteria in the Programme Guidelines.

Project Outputs/Outcomes (provided by applicant - excerpt from application)

Health care and social assistance plays an important role in the Yarra Ranges economy. The construction of the Health Hub will service a catchment population of 215,000 with enhanced access to health services and facilities for the local and surrounding communities. Access to the Belgrave Hub and its specialised services will improve health, community and knowledge outcomes within its catchment communities. This has long-term benefits in creating healthier communities, which in turn will lead to positive economic and social benefits more broadly. The output consists of a two storey 900sqm (approximately) purpose built facility with multi purpose rooms, consulting rooms, office accommodation, store rooms, kitchen, amenities, outside play space, lift and car park.

Assessment Summary

The application for funding of the construction of the Multi-Purpose Health Hub in Belgrave was assessed as value with relevant money with a final rating of 26 out of 30 following weighting for economic benefit as assessed against Assessment Criterion 1. The application met or exceeded the minimum benchmark for each assessment criterion.

The applicant has provided a very strong case to support claims that this project will contribute to economic growth in the region. The project will create 57 construction jobs and inject \$18.6 million into the Yarra Ranges economy during and after the construction phase. Another 56 jobs and \$3.573 million will be generated during the operational phase. Claims to support economic growth in the region have been supported by evidence.

Areas of disadvantage were identified as inadequate health services for the aged and families, unemployment and low median incomes in the region. The project will provide health services to the Yarra Ranges outer eastern areas and increase employment opportunities in health and construction with anticipated longer term economic and social flow-on effects.

The total project cost is \$10.42 million (cash and in-kind) and partner funding of \$6.585 million is 63.2 per cent of the total project cost. There are three funding partners and they are providing \$4.835 million in cash and \$1.75 million in in-kind contributions.

Project planning and sustainability documentation provided by the applicant supports the case that the project is viable and the applicant has the necessary experience and capacity to fund and sustain the project. Three risks were identified which can be mitigated through the Funding Agreement.
