Many people are aware of dangers facing road users...

- **85%** agree a 70km/h road crash is a lot more severe than a 60km/h crash.
- **4 in 5** believe talking on a mobile increases risk of a crash.
- **61%** most drivers completely separate drinking and driving.

Most support rules and enforcement to address these risks...

- **98%** agree with random breath testing (RBT).
- **96%** agree with drug testing drivers.
- **81%** have seen police conduct RBT in the last 6 months.
- **37%** have had a RBT in the last 6 months.
- **88%** agree with 40km/h limits in high pedestrian areas.
- **65%** approve of point-to-point speed enforcement.
- **19%** have been booked for speeding in the last two years.
- **10%** have been drug tested while driving in the last two years.

Nevertheless, many still undertake unsafe behaviours...

- **64%** use a mobile phone while driving or riding.
- **47%** said they have driven while feeling fatigued.
- **23%** said they have fallen asleep at the wheel.
- **21%** don’t allow extra space for heavy vehicles when merging or changing lanes.
- **6%** drive or ride at least 10km/h over the speed limit most of the time.
