Welcome Message

Welcome to the latest edition of the community newsletter, and my first as Administrator of the Indian Ocean Territories (IOT).

I have spent the past couple of weeks getting across my new role, and thank everyone who has supported me in the transition. I am excited to be back on Cocos next week in my first visit as Administrator.

For those who don't know my background before my appointment, I am an experienced engineer and project manager and have been on the boards of several local development and industry organisations – including as the Deputy Chairperson for the Regional Development Organisation and Treasurer for the Christmas Island Business Association. I have also represented the community as a councillor for the Shire of Christmas Island and the secretary for the Christmas Island Islamic Council.

Looking forward, the next months and years promise to be an exciting time and significant time for the IOT. There are challenges facing the region, as well as long-term opportunities to seize.

Being a fourth-generation Christmas Islander, my local knowledge and experience of our remote home – as well as passion for our region – will drive my tenure as Administrator. I am determined to be a strong advocate for the Christmas and Cocos Islands – particularly around some of the key challenges facing our region such as freight and air services, housing and impacts of climate change – and ensure that your voices are heard in discussions around our shared future.

I am excited to hit the ground running and am energised by the work of developing a stronger future for the IOT, together with you – the community. My continuous focus during my time as Administrator will be building stronger relationships with the people of Christmas and Cocos Islands, as I represent the Australian Government on island.

We are the most diverse, multicultural region in Australia with distinct views and ideas to how we shape the future of our region.

My aim is to bring the community together with government, to build a shared pathway forward towards a stronger, more resilient economy, environment and region.

Some of my key priorities and where I can see opportunity and potential, are around community wellbeing and social issues.

Over the past few years, the importance of physical and mental health has been brought into stark relief through the COVID-19 pandemic. I am proud to be a part of a community that was proactive in the COVID-19 response and who were compassionate and disciplined in keeping our vulnerable community members safe.

I hope that even as we enter a new phase for our region and as the intensity around the pandemic winds down and we adjust to our new normal, that we keep these ties and values that bind us and use them to shape our shared future.

I know that my achievements in this role will be shaped by how well we engage and collaborate, and I would like to encourage all of you to come and speak with me if you have any concerns, thoughts or ideas – so that I can support you and our community.

I've already met with a wide range of you and welcome a chat in person so please drop us a line or pop into the office to chat with myself and my team.

If you would like to find out more about anything in the newsletter or you would like a hardcopy, please contact my office. Let us know if you want us to include your upcoming community event or activity in the newsletter. Stories (including photos) about recent IOT community events are very welcome and can be emailed to IOTAdministrator@infrastructure.gov.au.

Administrator of Christmas Island and the Cocos (Keeling) Islands

Latest News

Ensuring our volunteers are prepared for emergencies

During the first half of May 2023, WA Department of Fire and Emergency Services (DFES) visited the IOT to carry out training and take part in awards presentations recognising the contribution of present and past members on CI and CKI.

DFES District Officer, Regional Preparedness Mark Feast made the trip as part of the service delivery arrangement with the Australian Government which sees DFES provide a range of training to the Volunteer Fire and Emergency Services (VFES) and Volunteer Marine Rescue Service (VRMS) personnel on Christmas and Cocos (Keeling) Islands.

On **Christmas Island**, the team carried out Road Crash Rescue and Breathing Apparatus training courses. The crash rescue training culminated in a joint exercise

with St Johns Ambulance involving a car crash scenario with live casualties.

Joint VFES and St Johns Ambulance Crash Rescue Exercise Christmas Island.

VFES Live Fire Breathing Apparatus Training at the CI Golf Course.

The Christmas Island Volunteers held an awards evening to celebrate the long service achievement of

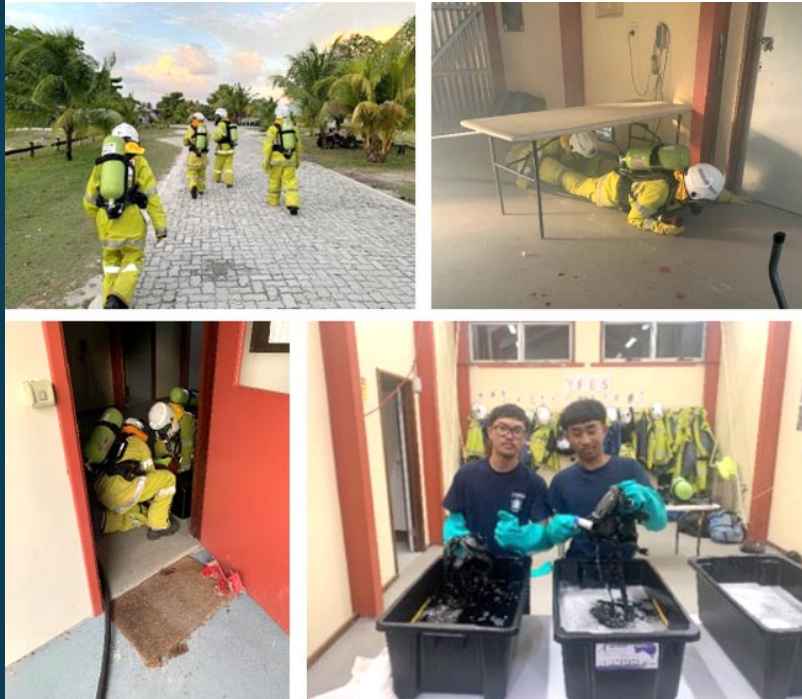

past members Garry Foo, Peter Smith, Patrick Chan and Kim Man Lew.

Captain Caitlyn Pink presenting awards to Pete, Patrick and Kim.

On **Home Island**, the team carried out a community safety / prevention visit, delivering fire safety messaging and practical demonstrations to the Year 3 and Kindergarten children at Home Island School.

This time around, as part of their Emergency Preparedness Training, the teams undertook breathing apparatus search and rescue techniques in smoke filled environments.

Breathing Apparatus Training – Rescue in smoke filled rooms.

The Cocos Home Island Volunteers held an awards evening to celebrate the long service achievement of past and present members.

Home Island VFES Awards Night.

Awards included Ex Captain Charlie Arkrie 25 Years, Kenneth Zakaria 25 years; Elman Yonelle 20 years; Osman Hajat 20 years; Shakirin Keegan 20 years; Adam Rabuha 20 years; Mohammed Woren 15 years; Luty Yakin 15 years; Captain Huz Balmut 10 years; Zahlan Hamiril 5 years and Siddiq Juljali 5 Years.

Thanks DFES for all the work and planning that goes into each visit, and thanks to all our volunteers for their service and ongoing dedication to their important roles in the IOT community.

Elder Abuse Awareness Day

The Indian Ocean Territories Health Service hosted a special morning for all Christmas Island seniors in recognition of World Elder Abuse Awareness Day. June 15 is an annual day when the world voices its opposition to abuse inflicted on older people.

According to Advocare WA, one in six older Australian seniors experience some form of abuse and 75 per cent of abusers are family members.

Detective Sargeant Rod Swain opened the event with a warm welcome to 49 seniors and highlighted the importance of elder abuse awareness.

Seniors were on the edge of their seats while an intense game of bingo followed, with Denis Anderson taking the prize, sponsored by the Australian Federal Police.

Olympic Visit

Between 23-30 May, Australian Olympians Natalie Burton and Damien Schumann made the trip across to the Indian Ocean Territories (IOT), to share their experiences as elite athletes, spread the Olympic values of excellence, friendship and respect, and encourage the local Christmas Island and the Cocos (Keeling) Islands communities to 'Have a Go' at Olympic sports.

The purpose of the visit included holding a series of Olympics Unleashed sessions, where Natalie and Damien inspired and motivated participants to overcome challenges and achieve their goals, and holding Have a Go Workshops.

While on island, basketballer Natalie and volleyballer Damien shared their personal Olympic journeys with local school students, inspiring them to chase their own passions – whether school, music, art or sport – and passing on important messages around resilience, overcoming adversity and how failing is okay as long as you have a go.

Having both retired from elite sport, Natalie and Damien are now focused on inspiring and motivating the next generation. While on island the Olympians provided valuable lessons and training in their respective sports, through sports clinics and tournaments – passing on their experience and

expertise to a very willing and engaged cohort of locals.

Some of the key programs held during their visit included a Basketball Tournament delivered at the Christmas Island Recreation Centre, a Volleyball Clinic – also at the rec centre and Country Week Volleyball Training at the Christmas Island District High School.

Nine Olympics Unleashed sessions were held on both Home and West Island, as well as Christmas Island, to a total of 342 students.

It was both Olympians' first time visit to the IOT and while in the region, Natalie and Damien were able to experience the local culture and environment, taking part in guided island tours and cultural and community events, something which left an indelible mark on both visitors – including a community dinner on Home Island and a community barbeque on Christmas Island.

The visit with Natalie and Damien was funded by the Australian Government, through the WA Department of Local Government, Sport and Cultural Industries.

Sports visits

Over the past couple of months, there have been a number of exciting visits from sporting organisations to the Indian Ocean Territories (IOT), including from Tennis West, Tennis Australia and the National Rugby League (NRL) WA.

The seven-day visit from Samantha Gulliver from Tennis West and Joel Pleydell from Tennis Australia to Cocos during late April and early May was a fantastic opportunity for students and the community across Home and West Islands to participate in some very fun tennis-based events.

These included the Tennis West Launch Tennis Session at the Home Island Tennis Courts for the fourteen attendees aged between 8-15 years old, the Introduction to Hotshots Community Coaching Workshops, the Round Robin Tournament and Coaching on West Island and sessions with the Cocos District High School on West and Home Island.

In early May, NRL WA's Mitchell Wade-Whalan from Western Australia made the trip over to both Christmas and the Cocos (Keeling) Islands, for school and club visits as well as coaching and referee courses.

Coming up, we have some more visits scheduled including Alex Rumball who will be on Cocos from 1 -14 July to deliver sailing training across twelve days to interested community members.

The sporting visits to the IOT are funded by the Australian Government, through the Department of Local Government, Sport and Cultural Industries.

Summit to Drumsite Water Main Replacement update

Works to replace a 3.7km section of the Summit to Drumsite water main have kicked off, providing a major boost to the ongoing security of Christmas Island's water supply.

The works to replace the water main commenced on 29 May, starting from the Summit tank in the national park and progressing towards the Drumsite tank.

So far, 1.3km of pipe have been laid, with works anticipated to be complete by October this year.

The water main replacement project is funded by the Australian Government, through Water Corporation, with the project supporting a more secure water supply for Christmas Island into the future.

AUSTRALIA'S BIGGEST MORNING TEA!

Thunder and rain did not dampen the mood for our Morning Tea. Approximately 70 people joined us for a wonderful morning of community. Thank you to following businesses and individuals for their donation of food and coffee.

***Ash and Mardi from Cocos Picnics,
The ladies at Tropica Restaurant
Azah from the West Island Supermarket
Tony and Amba from Salty's Café
Chelsea from the Cocos Club
Mak Iz, Mak Alfin, Mak Adi and Mak Fifi***

Thank you to Christmas Island Post Office for their generous donation of items for our Monster Raffle. Congratulations to our 13 winners!

Door Prize Winners

SILENT AUCTION!

Thank you to everyone who donated to our Silent Auction – all 59 items and everyone who dug deep with 207 bids received!

We would like to thank John Ford for accepting off-island email bids, allowing our friends near and far the opportunity to help us raise funds.

Cocos Islands Golf Club Donation!

We would like to thank the Cocos Islands Golf Club who partnered with us once again to support our fundraiser. All green fees and club hire were donated to our Australia’s Biggest Morning Tea totally \$246.00!

Thank you to everyone who went along for a great game of Scroungers and to the Golf Club Committee.

We are so proud to announce that Cocos has raised:

Donations (Morning Tea)	\$ 1635.00
Online Donations	\$ 854.00
Monster Raffle	\$ 560.00
Lucky Dip	\$ 90.00
Silent Auction	\$18,979.00
Cocos Islands Golf Club	\$ 246.00

TOTAL \$22,364.00

Joint Committee for the IOT Supply Chain Review

Number: 02/2023. Date: 23/6/2023

News from the Joint Committee – Progress update on the independent review of air

freight, shipping and passenger services.

The Joint Committee met today to discuss progress of the Indian Ocean Territories (IOT) Supply Chain Review. The project has been engaging with key stakeholders across the supply chain over the past few months to understand the issues, challenges and potential priority areas for improvement.

Project consultants Centred Solutions have conducted over 30 stakeholder interviews obtaining insights, data and challenges into shipping, air freight, passenger movements and infrastructure associated with the supply chain in the IOT.

A number of issues and recommendations from this work were presented to the Joint Committee at today's meeting. To guide further exploration into a range of detailed key recommendations, Committee members were also asked to rank the high-level recommendations in order of priority.

Recommendation themes	Priority recommendations (1 being the highest priority recommendation across each theme)
Infrastructure	1. Investigate potential improvements to Christmas Island (CI) port and infrastructure to reduce sea freight delays.
	2. Identify any positive or negative impacts of Cocos (Keeling) Islands (CKI) port upgrades on sea freight capacity on CKI.
	3. Investigate potential efficiencies and improvements at CI airport.
Coordination and scheduling	1. Investigate air freighter scheduling.
	2. Investigate potential improvements to CI and CKI port sea freight coordination and scheduling.
	3. Investigate opportunities to increase capacity of passenger flights.
	4. Identify if there are opportunities to remove the need for a fuel stop at Exmouth.
Market / Pricing	1. Examine existing passenger and air freight services / contractual requirements and make recommendations on how to improve services, baggage reliability and flight recovery approaches.
	2. Investigate models that would create market competition / contestability for sea freight.
	3. Investigate barriers and identify opportunities to attract commercial international flights into the IOT.
Priority / Excess Baggage	1. Review allowable excess baggage on passenger flights.
	2. Investigate ways to better enforce the priority baggage system on passenger services.
	3. Review the pricing structure to better manage excess baggage on passenger flights.
Food security	1. Support local supermarkets to improve supply / pricing to meet local demand and access reliable freight coordination and pricing.
Freightshop	1. Review Freightshop freight procedures and identify opportunities which could create efficiencies.

The next steps in the review will examine these recommendations in more detail through analysing stakeholder feedback, reviewing existing literature on the supply chain related to each recommendation, conducting data analysis, and framing / testing potential options for improvement.

At the same time, project consultants are mapping the process of how freight and people move through the system across air freight, sea freight and passenger services, with a view to examining the entire system to identify potential improvements in efficiency, policy, and regulation.

The Joint Committee will meet again next month to review and consider all of this work, to identify the most effective ways to improve supply chain

effectiveness, and how this can better support business, community and operations within the region.

Background

An independent review of air freight, shipping and passenger services is being conducted after the priority was identified in the [IOT RDO 2030 Strategic Regional Plan](#). Through the review, it is hoped that opportunities to sustainably improve the reliability and efficiency of the region's supply chains can be identified, and recommendations developed that can be implemented, monitored and reviewed.

The Joint Committee was formed to provide project governance and take a central role in the review. The Joint Committee oversees the project and provides operational direction and stakeholder input. Joint Committee membership includes representatives from the Indian Ocean Territories Regional Development Organisation (IOT RDO), Christmas Island Business Association (CIBA), Shire of Christmas Island, Shire of Cocos (Keeling) Islands, and our local Member of Parliament Ms Marion Scrymgour.

If you would like further information on this project please contact the Committee Secretariat at supplychainreview@iotprojects.com.au.
