

I strongly oppose your application to impose new laws on our current media platforms .Freedom of speech is a God given right to all.be it right or wrong .nobody should have the right to decide what is factually correct and what is factually incorrect until challenged in a court of law if required. The problem with your proposal is it is unfair as the public will be censored and judged without trial,however the government can publish or preach whatever they choose without question or accountability which is communism. We are not a communist country and never will be .how dare you propose a law that silences peoples freedom of speech.
