

Department Infrastructure, etc

New ACMA Powers Submission.

Your new proposed powers are not putting Australia in the forefront. Just the opposite, taking us back to serfdom.

Who defines misinformation, do we have a vote on it. No the bureaucracy decides. So you are proposing to censor free speech at the whim of bureaucrats and politicians. I am quite capable of deciding for myself what I want to listen to and believe. I do not wish to be dictated to by the aforementioned people.

If I am able to vote then I can likewise discern what to listen to and believe.

The proposal smacks of a means by which government can silence opposition and criticism and favour those media which will "kowtow to the party line ". This is not democratic, it is tyranny.

I do not support this legislation. There is no argument put forward to justify it. We have been doing just fine without such draconian measures.

Yours faithfully
