

I do not agree with the bill whatsoever. I believe that this bill is unlawful in accordance with the Human Rights Act. Freedom of speech is important and it was clear during COVID that the government and the WHO were publishing disinformation themselves. The govt is still concealing information from the public regarding the virus. All the research I found quite easily through google showed me we should have never had lockdowns, nor mandated vaccination. Many people lost their lives due to the vaccine. Government did nothing to stop it because the government and the medical system in this country get kickbacks from pharmaceutical companies. The public who use social media ought to be allowed to express their opinions. Our elected representatives are supposed to work for all Australians but they do not. It will be a mistake to allow this bill to get passed. Why did our grandfathers go to war in the first place when the government is prepared to turn this nation into a socialist, communist dictatorship and putting in laws that stop people from criticising the government and from

questioning the govt, particularly when it is abhorrent, some of the things they do. I havent an attachment, but what this proposed law represents is the first step toward stalinism. I am so disappointed with government at present. I will fight to protect my right to question government publicly as so many people are oblivious to what tactics the government uses as it conspires against us on a daily basis. Our constitution speaks about people not discriminating against one another. There need not be a bill of this nature. It is wrong on every point.
