To whom it may concern,

I am writing in regards to the Bill that will enable the ACMA to monitor efforts and require digital platforms to do more, placing Australia at the forefront in tackling harmful online misinformation and disinformation, while balancing freedom of speech.

Although I believe that misinformation and disinformation does pose a threat to the safety and wellbeing of Australians, as well as to our democracy, society and economy. I am very concerned with who decides what is misinformation and disinformation and whether there is an agenda behind hiding information under this Bill to suit a government or corporate control of the population.

Further regulations will monitor and prevent independent journalists from sharing The Truth about what is and what has been going on all around the globe. They have bought the truth to light about what has been going on over the last few years with regards to the 'Plandemic' Almost anything I shared on social media was blocked or deemed misinformation, dangerous content and often banned from social media. Independent journalists sharing facts found on government websites, statistics that were published by The World Health Organization, all banned from social media. This is not protecting the Australian public, this is a form of control that will enforce a regime of suppression of any speech on social media that undermines government claims.

There are global concerns regarding CBDC, food scarcity, energy and how to combat these issues. Many of the decisions are being made by unelected people and these Bills are slowly being pushed through without public knowledge. The only reason I am aware is because of dedicated journalists on social media platforms and people sharing their own experiences in other parts of the world. Unfortunately, main stream media platforms are owned by corporations who are 'In Bed' with the government, if this Bill is passed it will take away our democratic society, and our personal right to freedom of speech. Taking away our freedom of speech and allowing others to investigate and share ideology against what the government wants us to hear and belief will only create a fearful society who conforms to dictatorship.

Kind regards,
