

Federal Labor's misinformation bill is an attack on free speech and is Orwellian. Why should government decide what is misinformation and what is truth. Governments use propaganda and spin to get their way, especially during elections. They are no arbiter's of truth.

Look at history. Nazi Germany controlled media and used propaganda. They were the ultimate arbiter's of "truth" but it was for their gain. Any differing opinions were shut down just like in Russia today, where only government run media is allowed and outside information is shut down.

Will Federal Labor use this bill to silence different opinions! To censor Australians!

This bill is an attack on democracy and free speech. It is dangerous and extreme overreach by the Federal Labor government!
