

To: ACMA

I wish to submit a protest of Government censorship on social media as follows:

- Australians live in a democracy where the people have the freedom of speech and thought, and Government should be protecting these freedoms not suppressing them.
- This Bill undermines democracy and will stop debate or opinion.
- I object and protest that Australian Government Bill to label any truth telling or opinion/debate as misinformation and disinformation is something I would expect in Communist China not in Australia.
- Limited speech is far more dangerous to society than the consequences of false claims.
- Putting social media in charge of misinformation/disinformation censorship is an open invitation to a one-sided opinion on their 'truth' which may not actual truth. Example: during all information re: COVID was censored and controlled by Government 'experts' to suit their own narrative, and medical experts in the field of infectious disease nor scientise all were censored and silenced – just like the Chinese Government in China.
- Freedom of speech is enshrined in the universal declaration of Human Rights!
