

You cannot have democracy without freedom of speech or freedom of opinion. The censorship of all opinions apart from those chosen by governments does not allow for a democratic society. This Bill denies public opinion, freedom of speech, civil rights, and the right to reply. Without robust debate within society, we cannot have open and transparent democracy. This bill is overreaching and violates the Australian peoples inalienable human rights.

How can the truth prevail if the governments advisors are following false paths and no one else's opinions are permitted?
