

I do not consent to this misinformation disinformation Bill

The mis/dis information from the government and media destroyed many lives over the Covid period and they have shown that they are capable of acting with reckless abandon and for their own interests rather than for the benefit of Australians. This Bill will allow more of the same and worse.

This much control should not be in the hands of the few, especially considering the proposed consequences. The idea of government approved speech is a hideous concept to be even considering.

I have no confidence in this government as it currently stands.
