

## Proposed new ACMA powers: 'Have Your Say' Submission

To Whom it May Concern

Firstly, thank you for allowing Australians to have their say on such important Legislation. And thanks also for your patience with this 'essay'; these are weighty, complex matters that need due consideration.

I truly believe it would be a serious mistake to give new 'Powers' to ACMA, especially along the lines of censoring so-called 'misinformation'. This would be an anti-freedom, anti-democratic escalation of Govt power and control.

I'm assuming seeking more powers for ACMA has partly, or largely, been precipitated by the last few years of Covid and the globally mandated medical treatments. And these in contrast to volumes of independent, medical and scientific opinion contrary to the MMN (see below).

It seems clear that MSM is already heavy-handed enough, through (largely) nameless 'fact-checkers' and 'experts' in censoring, cancelling and slandering any contrary scientific and medically-evidenced online opinion. There is abundant evidence that Western governments globally have already colluded with MSM to 'manage' 'misinformation' and 'disinformation'.

Concluding this submission I have included supporting references and online links. These include authoritative and important evidence for the main points of this submission. Please do read them, the last is a link to a video.

Before continuing, some abbreviation keys for brevity:

MSM = Mainstream Media & Social Media.

NCIM = 'Non-Corporately Invested Media' (my own term), or 'Independent Media', is a more accurate term than 'Alternative Media', or 'non-MSM'.

RCT = Random Control Trials

MMN = Mainstream Medical Narrative

There are literally 1,000s of highly qualified doctors, scientists, medical professionals, epidemiologists, etc, who, during the C-19 pandemic, have been very vocal re their counter-opinion against mainstream medical governance

pronouncements nationally and internationally. Many have lost certification and important positions in hospitals and medical institutions, just for voicing their medically-evidence-based opinions re Covid-19 treatments. Their willingness to sacrifice their valued professions reflects their utter conviction.

Science flourishes best when constantly questioned and challenged. The most effective medicines and treatments have endured years, even decades of such purging questioning, and re-questioning of premature conclusions. Such questioning has produced the most certain efficacy and safety.

May I put forward a personal and illustrative example. 2 years ago I was on the Sunshine Coast on a family holiday, and experienced a sudden, acute attack of abdominal pain, to the extent I attended ED 3 times in 2 days, becoming so dehydrated I was admitted to hospital for 6 days. While in hospital, I received 3 varying diagnoses of my condition; a bit of a mystery. One strong opinion was from a Specialist, so certain of his diagnosis, he offered to short-track me into surgery to remove my gallbladder. He was quite insistent. I declined until further testing was more conclusive.

Subsequent testing showed my gallbladder was fine, yet I could've easily lost it there and then! Seemingly case-solved, from a 'highly qualified specialist'.

Upon returning to [REDACTED], I consulted with a Gastroenterologist, who after a (2<sup>nd</sup>) Endoscopy, and a Colonoscopy, concluded I'd probably contracted a severe bacterial infection (there *had* been a sewerage spill in the car park of our holiday accommodation). Upon reflection (I try to be intuitive about what I experience in my own body) I believe that this 4<sup>th</sup> 'medical expert' was correct, and the first 3 doctors had diagnosed incorrectly. Seeking a 'second' opinion on serious medical treatments is often critical to the best outcome.

Informed medical consent, bodily-autonomy and medical-info freedom should be a given in a free and democratic society. I was happy to hear from each 'medical expert' of the 4 above, but I had to decide for myself which medical treatment I would undertake.

I also believe that it is very evident that there has been decades long, undue influence from the 'giant corporate medical industrial complexes', specifically 'Big-Pharma', on international and national medical governance bodies

globally. For example, upon WHO, The US FDA, CDC, our TGA, and other very influential medical institutions.

██████████ is an example of an individual medical authority who wielded huge influence on Covid medical responses, not just in the USA, but globally. There are tranches of evidence to demonstrate fraudulent and corruptive connections between him and Big-Pharma. Robert F. Kennedy Jr (nephew of the late JFK) has written a comprehensive book on this, [The Real Anthony Fauci](#). RFK Jr has subsequently been maligned, slandered, labelled, and ostracised, even by his own family. He is now running as a Democrat Candidate for the upcoming 2024 US Presidential elections! He has successfully led litigation, class actions, against multiple Pharmaceutical companies, to the tune of \$100s of millions. In so doing he has delved deeply into their corruptive influences on medical and other governance, globally.

Another complicating factor is, a handful of international, mega-Investment companies (eg, Black Rock), or their subsidiaries (they have been busy undertaking M &A for decades) have majority/controlling shares ownership of 'Big-Agri', 'Big-Food', and 'Big-Pharma' companies. They also have majority/controlling ownership of most major MSM international media outlets. It is simply a business decision, and responsibility to share-holders, for MSM to support the MMN, consequently supporting their own investments. In this and myriad other ways 'oligarchs', and NGOs like the WEF, have wielded undue, commercial, anti-democratic influences on 100s of international leaders.

Hence, an Emergency Use Authorisation mass vaccination program was pushed heavily as, 'the only safe way out of the pandemic', and 'safe and effective'. The truth is, these could never have been actually scientific statements, when C-19 vaccines were developed and rolled-out in less than 12 months. In the history of major pharmaceutical trials, the previous shortest duration of scientific trials, proper RCTs, before roll-out has been 7 years! It's a known fact the independent RCTs are required to scientifically observe potential short, medium and long-term 'adverse effects'. And the C-19 trials were conducted by ██████████ and like companies, themselves, not independently! Knowing that there would potentially be tens of \$billions of profit; 100s of \$billions for a global roll out, over several years! A stupendous conflict of interest!

So our Australian/State Chief Medical Officers, and others globally, all in sync parroted the same highly emotive phrases: 'Safe and effective', 'the only safe way out of the pandemic', 'this is a pandemic of the unvaccinated', 'Trust the science'. Truthfully, none of these statements could possibly be 'scientific'. They were purely slogans, advertising, promotions to represent the experimental 'vaccines' as the only course of effective treatment. 'Trust the science', is more of a religious statement of faith, than actual science! And undue fear was the foundation of the globally coordinated C-19 response.

Any alternative, even medically-evidenced treatments, were treated with contempt. For example, Ivermectin, was not only labelled 'horse-medicine', it was banned for 'off-label' prescription as a C-19 treatment in Australia and many other countries. It turns out there are around 80, independent, peer-reviewed clinical trials internationally (USA, India, African nations) showing that it works as a 'protease inhibitor', slowing down the multiplication of C-19 virus in human cells, giving our natural immune system time to develop natural immunity against the whole virus, not just against the 'spike-protein'.

But 'vaccinated C-19 immunity is better than natural immunity' (another slogan) ... for the first time in virological history! Not to mention, Ivermectin has been one of the safest and effective medicines ever, proven from over 50 years of use as an anti-parasitic, saving 10s of 1000s of lives in developing countries. 'Horse medicine' !?

I realise the ACMA proposal will be about more than medical information, but clearly C-19 and the mandated vaccines, and the huge swell of protest has precipitated the 'need' to give ACMA new powers. This questioning of the MMN was not from a fringe-minority, but a 'minority' of many 1000s of doctors and scientists.

And medical-statistical fact now shows us that Covid-19 had a case/fatality rate (CFR) not much higher than seasonal flu, and among people under 18, significantly less CFR than seasonal flu. Yet, globally, the MMN and Big-Pharma continues to push for C-19 vaccination of children, youth and pregnant women?

Bureaucracies globally have already wielded enough power and slander against authentic, medically-evidenced science for the past few years. The last thing

freedom of information and speech needs in Australia is another bureaucratic layer to censor, cancel and malign NCIM. ACMA would also potentially be corruptively influenced by Pharma-~~Billions~~ already dished out to the WHO and other major NGOs, major hospitals and medical training facilities, even many governments.

The second highest fund source of the WHO is, The [REDACTED], also one of the largest investors in Big-Pharma. That's massive conflict of interest. There are many such 21<sup>st</sup> Century 'oligarchs'.

'Wealth and power corrupt'. 'Absolute wealth and power corrupt, absolutely'.

By now some readers of my submission will be thinking, 'it's because of people and views as contained here, that we need more ACMA powers!'. Cancel another, 'conspiracy-theorist'. However, amid the 80+% (my approx.) of nonsense that is 'conspiracy theory', the balance is conspiracy and fraud reality, smoke-screened by a plethora of often ridiculous theories. History is riddled with such conspiracy-reality, and not just in developing countries.

One of the Govt Ministries of USSR was, 'The Ministry of Truth'. Required reading for every 'comrade' citizen was the magazine, *Pravda*, meaning, 'Truth.' With hindsight we know this was Stalinist 'truth' that the Communist Dictators wanted all citizens to believe was truth. And we know it wasn't objective truth, but manipulative, invested-in-the-Party, 'truth'! Propaganda!

Australia is meant to be a 'free-democracy'. Freedom of speech. Freedom of information. Freedom of expression. Freedom of belief and religion ... all within the framework of reasonable civil, moral and criminal law, of course.

However, the winds of social and ideological change and pressure are threatening our 'free-democracy'. Most Australians are educated enough to make their own medically informed, and other significant decisions. Medical consent is a vital part of freedom. 'Informed Consent' and 'bodily autonomy', has been violated in the roll-out of mandated C-19 vaccines. The MMN of the past few years has potentially violated the post-WW2 'Nuremburg Code'; which are internationally binding laws!

Please do not allow ACMA to become the 'Pravda' of Australia.  
(Supporting reference pages following)

Supporting resource-references and online links, with preview-contextual explanations (due to photo sizes) on the following 10 pages.

These are literally a small fraction of evidence contradicting the MMN and MSM. All of these should rightly have been headlines on the 6pm news, or front page of national papers. ACMA does not need more powers to censor!

Dept of Health NSW, the last 2 weeks of 2022, actual data of C-19 hospital and ICU admissions, and deaths. Early in the pandemic, Australians were reassured that 'fully-vaccinated' was defined as 2 shots. That rapidly changed to, 'boosters every 4-6 months'. In Australia, as mandates relaxed, uptake in boosters dropped dramatically. Considering this, these medical-statistical facts are telling. There is a significantly disproportionate representation of hospital and ICU admissions, and deaths, in people who took 4 or more shots. Very low representation of non-vaccinated. For relevant summary see bottom part of graph page 4, and page 5.

<https://www.health.nsw.gov.au/Infectious/covid-19/Documents/weekly-covid-overview-20221231.pdf>

The number of doctors, scientists, epidemiologists etc who spoke up contrary to the MMN were not a fringe minority, but a significantly large minority. Examples: The Great Barrington Declaration. Signed by nearly one million concerned citizens, over 16,000 Medical and Public Health Scientists, and over 47,000 Medical Practitioners. There are many other such medical and scientific bodies and alliances globally. To ignore, and even censor and remove such vast medical consensus would be scientific insanity.

US PRESIDENT'S ADVISER 'PLAYED DOWN LAB THEORY' ■ FORMER BOSS REVEALS FAUCI'S MOTIVATION

# Covid cover-up: how science was silenced

**WORLD EXCLUSIVE**  
 SHARRI MARRISON  
 SKY NEWS HOST

America's top infectious disease adviser, Anthony Fauci, deliberately decided to downplay suspicions from scientists that Covid-19 came from a laboratory to protect his reputation and deflect from the risky coronavirus research his agency had funded, according to his boss, one of the most senior US health officials during the pandemic.

In an exclusive interview, Robert Kadlec - former assistant secretary for preparedness and response at the US Department of Health - told *The Weekend Australian* that he, Dr Fauci and National Institutes of Health director Francis Collins generally downplayed any "red flags" about the Wuhan lab in the early days of the pandemic while they were trying to encourage Beijing to cooperate and share a sample of the virus.

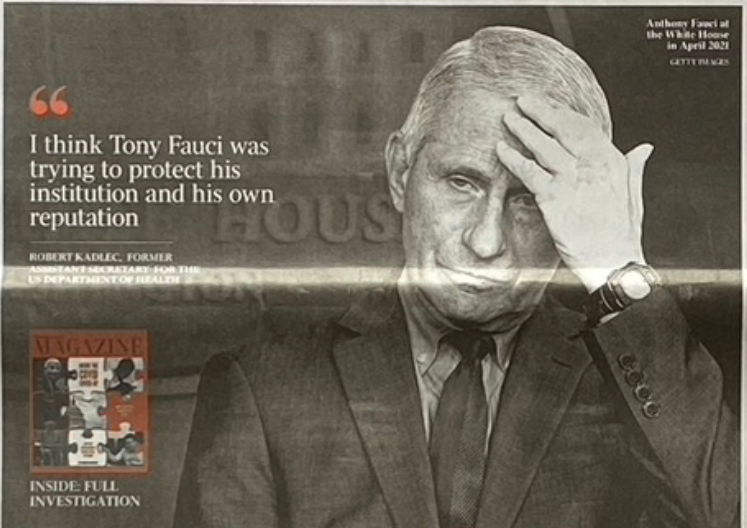

But the senior US health official - who worked for George W. Bush and Donald Trump and went on to lead American efforts to develop a Covid-19 vaccine - said Dr Fauci mostly kept his knowledge of intelligence concerns about a lab leak from Wuhan to himself.

The *Weekend Australian* revealed in 2022 that the National Institutes of Health and other US agencies funded 65 scientific projects at the Wuhan Institute of Virology over the past decade, many involving risky research on bat coronavirus.

Dr Kadlec's comments give the closest insight to date on how Dr Fauci - who led coronavirus policy for two presidents and influenced the worldwide approach to the pandemic - handled the link between Covid-19 and China. They came as US congressional investigations in the past month revealed how scientists worked to silence concerns about a lab leak.

"I think Tony Fauci was trying to protect his institution and his own reputation from the possibility that his agency was funding the Wuhan Institute of Virology researchers when, beyond the scope of the grants received from the National Institutes of Health, may have been working with People's Liberation Army researchers on defensive coronavirus vaccines," Dr Kadlec said.

"I think it's evident from his

**“I think Tony Fauci was trying to protect his institution and his own reputation”**

**ROBERT KADLEC, FORMER ASSISTANT SECRETARY FOR THE US DEPARTMENT OF HEALTH**

later revealed emails (obtained via Freedom of Information requests) that he had more sense of what his institute had funded at that moment. This was a reputational risk to him and his institute and certainly he probably sided with the international scientists that believed that false or unsubstantiated accusations could have a chilling effect on scientific collaboration between the western world and China."

Dr Kadlec, in his first ever media interview, added, "We think vaccine research resulted in the pandemic - that vaccine research was the proximate cause."

In an extraordinary admission, Dr Kadlec said they decided to try to encourage a group of leading international scientists to calm down speculation on the origins of the virus.

The scientists held a phone call on February 1, 2020, in which they discussed concerns that SARS-CoV-2 looked like it may have been genetically engineered.

"When we talked about this in advance of that call, he (Fauci) would just try and see if he could get the scientists to take the temperature down, turn the rhetoric down, to at least find, we're going to look into this but we don't know," Dr Kadlec said.

As both Mr Bush's biographer (Continued on Page 8)

## US support aimed at guided missile

**BEN PACKHAM**  
 FOREIGN AFFAIRS AND DEFENCE CORRESPONDENT

The Biden administration will become an active partner in Australia's guided weapons manufacturing plan, under a landmark agreement to equip the US military industrial base to produce missiles in Australia for American forces.

The breakthrough will be unveiled following AUSTIN talks in Brisbane on Saturday, together with new plans to strengthen military collaboration in space, step up the relations of US force through Australia, and upgrade the nation's northern air bases for use by both countries.

The initiatives were negotiated by Defence Minister Richard Marles and US Defence Secretary Lloyd Austin in a nearly two-hour bilateral meeting on Friday that focused heavily on "breaking down barriers" to defence industry co-operation.

The counterparts shared concerns over China's rising regional influence, resolved to ramp up joint military co-operation with Japan, and discussed the need to strengthen defence ties with other regional partners.

Mr Austin also reiterated Mr Marles' view of the national AIUKS pact amid demands by congressional Republicans for more than 100 per cent increase in US submarine production in return for allowing transfer of nuclear-powered subs to Australia.

Under the strengthened alliance partnership, the US will accelerate establishment of Australia's Guided Weapons Explosive Ordnance anti-rocket capacity once at its own weapons plants, have struggled to keep up demand arising from the US conflict.

It is understood Mr Austin pledged to plough through agencies the US system gives the transfer of sensitive technology to Australia, which will be essential for the AIUKS and the missile partnership.

Mr Marles said the initiatives are "highly significant" and demand would help an Australia's nascent missile industry. "What we're seeing commitment to do this in a new way," he said. "This is important for the industries of both our countries."

The two are understood to have discussed China's rising partnership with Solomon Islands and growing critical Australia and the US's strategy Prime Minister, Ms Scargro.

China's increasing grip on the Pacific nation of 19 million people, Mr Austin said ahead of the meeting with the US and Australia concerned by China's focus on the Pacific nation.

Australia via Papua New Guinea said ahead of the meeting both the US and Australia concerned by China's focus on the Pacific nation.

## Farmers' revolt threatens to stifle the voice

**EXCLUSIVE**  
 JOE KELLY  
 SARAH BROWN

The nation's peak agricultural lobby says West Australian farmers are "paralysed with fear" and uncertain "what they can do on their own land" because of new Aboriginal cultural heritage laws that focus on a key theme to the voice referendum and Labor's political dominance in the state.

The National Farmers Federation has sounded an alarm over Anthony Albanese's plan to legislate a stand-alone national framework for Indigenous cultural heritage protections, saying the

## Lehrmann case findings on DPP to be kept secret

**EXCLUSIVE**  
 STEPHEN RICE  
 NEWS EDITOR

In a shock move, the ACT government will keep secret the findings of the Subroff inquiry into the prosecution for rape of Bruce Lehrmann for at least a month as it ponders how to deal with what are expected to be serious adverse findings against the territory's chief prosecutor, Shane Drumgold.

It had been anticipated that when inquiry head Walter Subroff KC delivered his much-anticipated report on Monday, it would be released immediately. However, the government has said it will now consider the report "through a proper cabinet" process that ACT Chief Minister Andrew Barr estimated would take up to three or four weeks, with the Legislative Assembly to be "updated" at sittings at the end of August.

It is believed that at least two of the potential findings against Mr Drumgold, who has been on leave since May and is not due to return to work until August 30, would be grounds for his dismissal as ACT Director of Public Prosecutions.

## Fear, loathing and electoral retribution

**EXCLUSIVE**  
 JOE KELLY  
 JAMIE WALKER

Anthony Albanese's threat of a double-dissolution election informed by ALP calculations that it could cost the Greens several Senate seats, with the minor party's stand-off over the stalled \$10bn affordable housing package to target inner-city Labor seats across the country.

Greens supporters will this weekend aim to win over Labor voters as part of a co-ordinated door-knocking campaign in the inner-city Brisbane seats of Moreton and Lilley, the Melbourne seats of Fraser, Wills and Higgins, the ACT seat of Benn, the NSW seat of Sydney, and the seat of Adelaide in South Australia.

Greens housing spokesman Max Chandler-Mather said Moreton and Lilley in Brisbane were vulnerable because of the high number of renters living in them and were "the next ones off the block for us in Queensland."

"If you look at some of the suburbs in Lilley, up to 60 per cent of people in them rent and we'll be trying to take our message to those voters," Mr Chandler-Mather said.

The Prime Minister on Friday rapped up his attack over the Greens' decision to block Labor's \$10bn Housing Australia Future

advised and Mr Trump's assistant health secretary for preparations. Dr Kadlec has decades of experience in fighting public health risks. He created Operation Warp Speed, the plan to accelerate the development of a Covid-19 vaccine, and is credited for leading the push to vaccinate Americans in 2020, he wanted Congress the US was ill-prepared to respond.

Dr Kadlec's personal approach was to ask the National Academy of Sciences in late January 2020 to formally examine the sequence of SARS-CoV-2, to understand its origin. But publicly, he felt it was important to achieve co-operation from China from a public health perspective. Beijing had not yet shared a sample of the virus, critical for developing an effective vaccine.

"We decided to engage our national experts to look at this, the National Academy of Sciences," he said. "It would take time to figure out what was going on. We were trying to prevent people from saying this was a bioweapon when we didn't really know. That was my intent. It was Dr Fauci's idea to see if he could get international scientists to examine the origins. The object was to prevent speculation and turn the temperature down. There was something that could be said to turn the temperature of rhetoric down and avoid the wild speculation of a bioweapon, that had already started at that point in time."

That there still was the speculation of Dr Fauci after he spoke with scientist Kristian Andersen who expressed concern that SARS-CoV-2 may have been genetically engineered, because of its unusual structure, was also a concern.

Dr Fauci's letter to the Institute of Medicine (IOM) and the National Academies of Sciences, Engineering and Medicine (NASEM) "asked for a review of the evidence and to identify any gaps in knowledge that would be needed to understand the origins of SARS-CoV-2," he said. "I was not a peer-reviewed paper."

Dr Kadlec said he had kept these requests, privately reviewed by leading scientists in a laboratory nearby to himself. The full extent of these requests were known in emails composed by US congress and published in recent weeks. In these emails, some scientists discussed the "shit show" that would ensue if a "genetic" origin of SARS-CoV-2 was publicly identified.

Dr Kadlec advised the federal cabinet members in the US under Mr Trump as a likely intelligence or international relations. But, publicly he insisted there was no evidence.

INSIDE

The possibility of an inadvertent laboratory leak was a conspiracy and authored a paper published in Nature Medicine that argued SARS-CoV-2 was almost certainly a natural virus. Dr Kadlec acknowledged the power of that paper, titled the Perennial Origins of SARS-CoV-2, as becoming the official record that a laboratory leak was a conspiracy theory.

That paper did much to casting the die for what would then be the international scientific response going forward," he said. "I found it really odd that in late

January and the former president did not make any public comment about a potential laboratory origin of Covid-19 until April.

The authors of the Perennial Origins paper were inspired in the media and congressional hearings. The later virus research had led them to scratch their first hunch of a lab leak - and to conclude instead that the origins of Covid-19 were zoonotic. The virus had been passed from animal to human, possibly via a wild bird or swine.

However, new emails and posts over the clock overnight platform that have surfaced in recent weeks suggest the moment this group report, covering world attention away from the Wuhan lab. It was not, in fact, a zoonotic virus, or even zoonotic, but with data and lines of their research that the virus may contain "fragments" that originated in the Wuhan Institute of Virology. The scientists are facing allegations that they embarked on a campaign of subterfuge that has rocked Washington.

Dr Kadlec has now spent a year and a half formally investigating the origins of the pandemic, putting together an A and B team to gather evidence for both a natural and laboratory origin respectively.

Genetic forensics research was banned by the Obama administration but lifted during the Trump era. Dr Kadlec says this was at the behest of the NIH. Francis Collins and Fauci both had a similar world view which was scientists knew best and there should be few restrictions on research," he said.

The Wuhan Institute of Virology and EcoHealth Alliance were set up for genetic forensics research, which international scientists now believe was a cover-up for genetic forensics research was banned by the Obama administration but lifted during the Trump era. Dr Kadlec says this was at the behest of the NIH. Francis Collins and Fauci both had a similar world view which was scientists knew best and there should be few restrictions on research," he said.

Dr Kadlec's "closed" a committee to determine whether gain-of-function could proceed. The report from the White House is being reviewed by US Government agencies in search of funding but never went through his committee. "It shows you the inability or unwillingness of the oversight system," he said.

Dr Fauci has denied his agency funded gain-of-function research but Dr Kadlec said this wasn't true. "His entire NIH supported research that has the potential for and at least one case resulted in gain-of-function."

Dr Kadlec advised the federal cabinet members in the US under Mr Trump as a likely intelligence or international relations. But, publicly he insisted there was no evidence.

<b>January 11, 2020</b> US president Donald Trump has flights from China to the US in a highly infectious virus taken hold in China.	<b>February 2</b> British evolutionary biologist Andrew Rambaut writes on a group chat on the messaging platform Slack.	<b>February 10</b> Fauci requests a specific change to their paper, saying "sorry to micro-manage you over" He asked them to change the wording that it was "highly" that Covid-19 emerged through laboratory manipulation of an existing SARS-related coronavirus to "suspectable".	<b>February 10</b> Fauci requests a specific change to their paper, saying "sorry to micro-manage you over" He asked them to change the wording that it was "highly" that Covid-19 emerged through laboratory manipulation of an existing SARS-related coronavirus to "suspectable".

## Who unleashed virus? US spy agencies have a name

<p>After discussions in early January, Kadlec, Bob, Mike and myself all find the genetic evidence with expectations for a natural process theory.</p>	<p>By the end of 2019, the Wuhan Institute of Virology had teams focused on MERS and SARS-related coronaviruses, which both "used" transmembrane proteins to better understand how the viruses infect humans as well as related vaccine and therapeutic research.</p>	<p>Dr Kadlec noted that the type of coronavirus vaccine research in which Zhou was involved was "very high risk" because it involved infecting live animals, administering some of them with a vaccine and using others as a control, and then keeping them alive for a period of days or even weeks before eventually euthanizing them.</p>	<p>Dr Kadlec said, "We don't have all the answers here, but perhaps Ben Hu was assisting the visiting professor, Zhou Yuesi," Dr Kadlec said. "He was an accomplished virologist. He had developed vaccines for flu, MERS and the like, and perhaps somebody said, 'Make sure that Dr Zhou gets what he needs.'"</p>

**Australian Government  
Commissioner  
Australian Taxation Office**

The Government is seeking applications for the role of  
**Commissioner of Taxation**

The Australian Taxation Office (ATO) is the Australian Government's principal revenue collection agency. It administers legislation governing tax, superannuation and business registries.

As Commissioner of Taxation, you will lead the ATO Executive leadership team to provide strategic direction to one of Australia's largest Government agencies, comprising over 20,000 permanent staff at 25 locations across Australia. As the Accountable Authority for the ATO, the Tax Practitioners Board and Australian Charities and Not-for-profits Commission as well as the Registrar of the Australian Business Register, Australian Business Registry Services and Register of Foreign Ownership of Australian Assets, you will be responsible for ensuring that the ATO achieves its purpose in effectively administering the tax, superannuation and registry systems.

The Commissioner will demonstrate high-level leadership and vision; be able to manage complex operations; work with others to meet objectives; have a high level of judgment; be able to represent the ATO at domestic and international forums and demonstrate a high standard of professional and personal integrity as well as the capacity to promote these in an organisation.

The Commissioner will also have experience and knowledge of the tax system, tax administration and the role of the ATO; as well as an outstanding record of achievement in a relevant field combined with knowledge of, or experience in, accounting, tax, finance, law, superannuation, regulation and/or government.

Applications close on 20 August 2023.

To apply go to [www.derwentsearch.com.au](http://www.derwentsearch.com.au) and search "Commissioner". For further information email [publicsector@derwentsearch.com.au](mailto:publicsector@derwentsearch.com.au) or call Andrew McEnroe on (02) 9223 1655 or 0416 018 860.

Fauci Misled Congress on Pharma Royalty Payments to NIH Scientists. After what is revealed in the W/E Australian, above, this reveals further deep layers of corruption in US Govt. and medical governance.

Judge orders White-House to stop censoring free speech. So, ACMA is seeking such powers, as this American judge has ordered the Biden admin to cease, from such unconstitutional censoring!

[https://childrenshealthdefense.org/defender/orwellian-tactics-social-media-censorship-white-house/?utm\\_source=luminate&utm\\_medium=email&utm\\_campaign=defender&utm\\_id=20230705](https://childrenshealthdefense.org/defender/orwellian-tactics-social-media-censorship-white-house/?utm_source=luminate&utm_medium=email&utm_campaign=defender&utm_id=20230705)

Note: 'Children's Health Defense' (CHD) was pioneered by RFK Jr after he saw first-hand corruption in Big-Pharma and its hard-push for an ever-burgeoning multiplication of 'scheduled vaccines' for young children, amongst plethora other layers of corruption. Not 'anti-vaxx', but anti vaccine abuse against children in particular.

Are NCIM, like CHD, the sort platforms of 'misinformation' and 'disinformation' ACMA seeks new powers to combat? Generally I have found that info on these NCIM platforms, much better researched and referenced and objective-science based than most content in MSM, executively directed to follow the MMN. On Wikipedia, every second doctor is a 'conspiracy-theorist', examples, Dr Aseem Malhotra, Dr Peter McCullough (Texas, cardiologist), Dr Robert Malone, etc.

Dr Kerry Phelp, and wife, both suffer serious adverse events from C-19 vaccine, 'doctors being censored'. This article in MSM, Dec. 2022. Since then, not a word of this on MSM.

<https://www.news.com.au/technology/science/human-body/dr-kerry-phelps-reveals-devastating-covid-vaccine-injury-says-doctors-have-been-censored/news-story/0c1fa02818c99a5ff65f5bf852a382cf>

Dr Melissa McCann, Covid Vaccine Injury Class Action, Australia

<https://rumble.com/v348nkr-covid-vaccine-injury-class-action.html?fbclid=IwAR3qOmJwlgKyOFCrfCvNh8gQyL9-Yf4G-EwViqGDSgmljkbk3H1yMUxURhU>

28 min video, an excellent summary of how Australian medical governance just followed lock-step with WHO and US Covid response strategies, that we now know, from medical-statistical evidence, were largely misleading, fear-mongering, vested in 'commercial science', and a failure! Dr McCann's Class Action is not filed lightly. She had 650 pages of evidence to propagate her case, and she has put her medical credentials and career on the line. As have 100s of other courageous doctors, health professionals, scientists, lawyers, and politicians nationally and internationally.

Again, what is referenced here is the 'tip of the iceberg' of factual, scientific and medical evidence, most of which can only be found on NCIM, and mostly already excluded and censored from MSM

Conclusion: Please, NO NEW, 'PRAVDA'-LIKE ACMA POWERS TO COMBAT 'MISINFORMATION AND DISINFORMATION'.

Quoting the most positively influential leader in human history:

***"When you know the Truth, the Truth will set you free!"***
