

The Government proposes to give ACMA (the Australian Communications and Media Authority) sweeping new "reserve powers" to police online "misinformation and disinformation".

I am NOT in favour of this Bill. The people it exempts from the Bill's scope, namely the mainstream media and the government itself, are the biggest offenders when it comes to spreading false information. Take COVID 19 as a prime example. Other nations have stopped the "vaccines" as they have proven them to do much harm, but the Australian government and mainstream media keep pushing the population to keep on getting jabbed.

We cannot trust our government to do things in our best interest when they keep pushing lies upon us that only benefit their big business puppet masters. The government is one of the few around the world still running with the COVID 19 lie. In Europe, the European Union government and MEPs such as Christine Anderson, are going after the World Health Organisation and the vaccine manufacturers for all the damage they have done, the millions of people killed and permanently disabled by the results of having let themselves be injected. Our government keeps telling us that anyone who does not agree with their view point about vaccines is a conspiracy nut, whereas real independent scientists have proven the exact opposite. Pfizer should have never been given immunity, the vaccine rollout has seen a 27% spike in mortality throughout Australia, and will likely contribute to 30,000 excess deaths this year alone.

Senator Malcolm Roberts - slaying Pfizer

Senator Rennick has pointed out a lot of evidence that Pfizer and Moderna have major side effects, but our main stream media do not carry these reports and do not operate to protect the Australian population, but rather benefit their owners.

We need free speech so that we can find out for ourselves what the truth is, and what is something with an evil hidden agenda. We need a balance of information rather than the government just telling us to blindly believe everything they say. Politicians lie time and time again, and this current government is very deceitful and breaks its promises. We cannot trust them to have our best interests at heart.

Why is the government pushing the climate change agenda, when the sold-out scientists pushing these lies have to falsify data to back them up. It is all natural weather cycles and manipulation by government geo-engineering. The more carbon dioxide in the atmosphere, the faster plants grow and the more oxygen they produce. Our government is a master of false information and uses it to put fear into people so that they can manipulate people and push through policies that harm people in the long run.

This Bill will silence voices telling the truth and lead people down the garden path to their ultimate destruction. Why doesn't the government show some integrity and come out and tell the truth that they are abiding to their commitment to the United Nations to comply with Agenda 21 and Agenda 2030 aimed at reducing the world's population by the year 2030.

Our government is actually a corporation that is registered in the USA, thanks to Bob Hawke and his Australia Act 1986. It is not a government of the people for the people, but a company run for the sole benefit of big multinational corporations and their evil owners. This is confirmed in the Public Governance, Performance and Accountability Act of 2013 and 2017.

Labor governments have a track record of doing underhanded, sneaky anti-average Australian citizen stuff when in power, such as the Australia Act. It is not time to suddenly trust them with putting this Bill through. They cannot be trusted.

In short, this Bill should be scrapped and if any politicians wish to continue with it or similar legislation, they should be charged with treason, in my opinion.
