

We need more speech to overcome "misinformation" not less speech. Do not censor speech because the people censoring it do what's best for capital (money). During covid my FB posts providing accurate scientific studies about natural immunity to covid, post infection, were taken down at a time when mainstream media was saying there is no natural immunity to covid (WRONG) - which helped the pharmaceutical companies make a lot of money. Also, saying that the covid vaccine did not stop the spread was censored too and we all know that that is a true statement. These are just a couple of examples. I have more... Many of us understand now that this bill is about controlling the population because the world is run by big corporations now and you know it.
