

I say **NO** to this bill.

We are a democratic society with the constitutional right to freedom of speech. In our democratic society we have the freedom to express ourselves, be it disagree or agree. Look at our beautiful multicultural country with everybody having the freedom to speak their truth, express their likes concerns or whatever they want.

It is our fundamental right and the importance of a democratic society to have free speech, free opinion and free discourse. Which leads to everybody participating “, which leads to a thriving democracy. I ask you, “ how can one person’s opinion be more or less important than any other person?” especially in our DEMOCRATIC society.

This bill should NOT get passed as it will censor and oppress free Australians right to their own opinion and their right to gather all information to create their own opinion. who would be given this right to dictate what they believe to be right or wrong, disinformation or misinformation. Information is just information, and I’m sure every Australian is intelligent enough to decide this for themselves not have someone decide this for them. If u take away free speech, we are not a democratic society and u have taken away our constitutional rights.
