

Hello ACMA,

Your new proposed censorship law has a big flaw I want to point out in order for you to plug it in time before anything is enacted.

I offer this as part of my service to the public:

Your current draft legislation does not specifically define what constitutes dis-information or mis-information, so let me help you out with some proposed additional language in order to avoid relentless legal battles aimed against ACMA or notices put against any man or woman in 'the authority' and executives of ACMA when your ill-educated, ill-informed and ill-qualified staff deem something that is a statement made by highly educated and qualified professionals citing peer-reviewed science - even research published by the WHO, CDC, FDA, TGA, etc. - as now being classified as disinformation or misinformation by corporate government agencies under ACMA's new dictatorial control over public media.

--

"Further, disinformation and misinformation - needing to be now censored and silenced at the sole discretion of ACMA - is specifically defined as any facts, opinion or re-presentations of either 'corporate government body' published or 'peer-reviewed' published data or statistics or other scientifically credible and established research that are now not in alignment or lockstep with the current 'official' narrative being paid for, promoted and demanded by the Rothschild/Cabal's et. al. captured global corporate public media assets, Bill Gate's WHO, or blackrock/vanguard's big-pharma/CDC/NIH/FDA or other private corporate or public corporate government agency propaganda, at the sole discretion of ACMA, a wholly captured agency with no lawful standing, in the interest of maximizing (blackrock/vanguard et. al.) quarterly shareholder earnings of said captured and owned corporate assets above.

Corporate government entities or agents including but not limited to the above are furthermore hereinafter exempted from conversely promoting what can be demonstrated - even proven to be - disinformation, misinformation, known false science or outright lies and fraud."
