

This proposed legislation is the most dangerous ever tabled in the Australian Federal Parliament and represents a direct threat upon any remaining true personal freedoms including free speech, personal sovereignty and an individual's security in Australia. If enacted it will give completely unwarranted and underserved power to unelected officials who can then arbitrarily shut down any internet enabled discourse and disclosure upon critical moral, ethical and potentially life-threatening issues within this country.

Throughout the COVID-19 incident of 2020-2023 the Australian public was patently subjected to direct government interference and stifling of public debate about facts completely pertinent to COVID-19 and its subsequent handling and policies. This was reflected also in main stream media reporting about COVID-19 which appeared to be in "Lock Step" with the government's insistence upon their certain version of "facts" about the disease and its subsequent approach to treatment and management. The erroneous and deceptive nature of the Australian government's position upon certain "government endorsed facts" is clearly demonstrated in the Australian government and main stream media insistence upon SARS-CoV-2 virus being of Zoonotic origin since 2020, but which now clearly appears (and is now accepted in the wider scientific community and has been tabled in Governmental hearings in the USA) that this virus is of man-made / synthesised origin. We also continue to have government stifled and controlled reporting upon the efficacy and safety of supposedly called "COVID-19 vaccines", which to date have arguably killed tens of thousands of people in this country alone (from official ABS statistics, excess deaths since the introduction of COVID-19 vaccines are in the order of 5000% higher than previous reporting periods). Another proven fact that the Australian government appears to ignore and dis-endorse is that COVID-19 vaccines in no way actually protect an individual from contracting COVID-19. So bad is the situation with respect to the actual complete lack efficacy of supposed "COVID-19 vaccines", the Australian government has actually had to run a parallel campaign pushing anti-viral medication in order to somewhat effectively treat COVID-19 in high-risk patients. The farce continually pushed by the Australian government throughout the COVID-19 incident has been embarrassing to say the least and this proposed legislation is completely intended to allow the Australian government future unfettered ability to push any version of their facts about anything they wish, without any wider public scrutiny, criticism or consequence.

In no way should the Australian government and its related departments be given any more control or power over free speech in this country. In light of the one example above which highlights the Australian governments "version of facts" throughout COVID-19, which have subsequently and clearly been proven to be deceptive and false, this proposed legislation should be scrapped immediately.
