

This type of power should never be tolerated in our country. No censorship. Who will judge what is mis or dis information? Some unelected govt beaurocrat? This is the slow march to communism. 1984 on steroids. I am absolutely against such powers. Let free speech be free. If it offends so be it. People need to have some guts to hear opinions they may not agree with. The social media platforms already censor speech. We don't need any more from ACMA.
