I object to the amendments to the proposed bills regarding to misinformation and disinformation which is attached below. People have the right to express their views and opinions no matter how differing the opinion may be. That is democracy. Controlling people's self expression and controlling whose comments are published and whose comments are not as they are flagged as disinformation is overreach of government and that is what happened in the Communist system and I know as I grew up in the communist regime. People were too scared to go to church in communist countries if they had a good job as spies would check who goes to church and if that person could be fired from work as they believed in god which was against the communist propaganda and beliefs, we had to worship Lenin. In kindergarden the children's books were about Lenin and how much he loved children and we had to wear a picture of Lenin to school attached to a broach on our uniform every day. No-one was allowed to speak out against the government or there was negative consequences. Now the same is happening in Australia. Wake up People!

I came to Australia to live in democratic country and now Australia has become worse than the Communist regime that I left. And this control is world wide, the new world order is being imposed on the world population by the globalists.

During the covid pandemic the government overreach was outrageous and worse than in Communism.

We were locked down in our homes, weren't allowed to leave home for more than an hour and only for essentials.

Then we were all coerced to take the provisionally approved experimental MRNA Gene therapy shots which even the inventor of this technology Robert Malone has spoken out against and said it's not safe. Some people who suffered from these covid shots with adverse reactions such as myocarditis, pericarditis and blood clots were ignored by their doctors and were gaslighted and told that it was only a coincidence and not related. They are the biggest victims as they got the shots as government and doctors told them they are safe. Please look on the NSW health website at the adverse effects database just how unsafe they really are, and not all adverse effects have been reported as it is actually quite complicated to navigate the website and difficult to find the place to report it.

Unvaccinated people have not even been allowed to go to the coffee shop or clothes shopping or go to work unless they proved that that they are vaccinated. That is the same what happened when Hitler made Jews wear a yellow tag and denied Jews their human rights or when the Aboriginal people were mistreated and not allowed in same swimming pools as the white people. It's discrimination and abuse of people by the government and the government flooded the media and tv with propaganda and brain washed people to be super afraid of this virus and there was even commercials on tv not to spend time with relatives and not to invite them due to their vaccination status. That was divide and conquer tactic by the government and the elite. The fear of the virus was worse than the virus.

Make sure you publish my comment anonymously, I will look on your website to make sure you do. As I insist to have my say. We actually need a Bill of rights in Australia like in America, not more control from the government.

We have a right to freedom of speech and to have privacy. So I also object for companies/government to keep comments that are labelled as disinformation for prolonged periods of time.

Please do not shorten my comment, if it doesn't fit, then cut it in half and publish everything I have to say and write part 1 of 2. Stop the control overreach as it will affect You and your family personally when you are no longer allowed to express your opinion.

Wake up people, speak up against government overreach or it will get even worse if you do nothing and it will become even worse than the former communist regime.

If people keep going along with everything that the government is proposing then the Chinese social credit point system will be implemented in Australia with the digital passport and we will be locked into 15 minute cities and controlled through the central bank digital currency and controlled by a new world order digital currency and if we don't obey all the rules then the access to our money can be blocked and we will have to eat crickets (which have chemicals which can make human beings sick as it's not food for human consumption, crickets are for birds) and worms and other bugs as the farmers and farting cows will be made out

to be causing global warming. We will be made to eat meat grown in a lab, please do your research people, is that what you want to eat? Go and do your research, and you will find out what I wrote is true. If you give up your freedom of speech and agree to these amendments then you won't be able to speak out as your comments will be labelled as misinformation. And those solar panels the government is pushing on us are flimsy and unreliable and I worked for home insurance company and so many people have submitted home claims as the solar panels would break easily after a hail storm as they would crack and stop working.

Regards [REDACTED] (wish to remain anonymous)
