

Have Your Say — New ACMA powers to combat misinformation and disinformation

To whom it may concern,

I would like to express my total objection to this 'mis/disinformation' bill.

Not only does it lead us further toward the horrors of Orwell's total authoritarian nightmare of 1984, but the government can't be trusted to oversee anything like that. No one can, information must be filtered through open discussion, not censored via easily corruptible groups of people.

If garbage like this bill passes I'll deeply question if this is the right country for my family, future children & our tax dollars.

Truly despicable to even consider such a bill.
