

I totally disagree with the ACMA proposal - a more Orwellian suggestion could not be dreamt up by even the most vile individual.

As a 4th generation Australian, who was brought up with free speech and debate, I really abhor the attitude taken by government and the general media - we are expected to swallow the most horrendous lies and disinformation, that they turn around in order to blame us - it is very un-Australian!

This regulation must be stopped and stopped for all time - it is totally against the principle of democracy, free thinking and free speech, all of which made our country so wonderful (until recently).

How dare you even think of wrecking this wonderful country, a country to which so many other nationalities want to come.
