Short comment

Airport parking and the costs of 'getting to & from' the terminal are ridiculous. Its always so exclusive and unnecessarily expensive.

Certainly, any exclusive train link should be re-priced down to the normal travelling costs over the same distance in that location. Parking costs should be based on an average parking price across a broad area such as a region or State. Taxi additional airport drop off and waiting fees need to be removed from taxi's and from us as taxi users. Uber and other competitors need to be able to pick up passengers from pick-up zones without additional charges.
