Short comment

We have lived in Balmoral over 20 years. Air traffic over the old Legacy flight path/ runway was bearable. The new flight path/runway is not. Planes taking off and landing 24/7, with rush hour starting 6am until 9pm every few minutes, then sporadic flight during night. There are no regulations governing plane noise over built up areas (homes). This must change. Regulations governing height for "take offs and landing" is full of loopholes. Must change. Planes are two minutes apart some days. Dangerous. Must change. Too loud, too low, too many planes is impacting my health, sleep and wellbeing, making our house, yard, street, neighbour a torture chamber of constant loud noise.. Brisbane Airport Corporation and Air Services Australia failed to involve, consult or warn the public. They do not listen to complaints or care about broken lives, only push what business and Government want to hear, much untrue. Both those organisations and their behaviour now and in the past deserves close scrutiny and action taken to hold them to account. Thank you. Photo is plane over our home, one of hundreds every day. Have further stronger video evidence if required.
