Short comment

Please put people before aircraft noise. Aircraft flying over my Queenslander house (that cannot be made sound proof) is close to unbearable. Brisbane is no longer the liveable city where you could entertain outside or even leave a window open to catch a breeze. Is it not our right to be able to live in peace. You can't start a mower up at 6am in the morning but you can have an aircraft fly over at 2am. Where is the fairness in this.
