

I live [REDACTED] The flights over [REDACTED] have increased dramatically over the past 2 and a half months. Flights just after 2am have been so low and loud as to startle me awake and make the house shake. The noise of the planes travelling north along the line of hills lasts several minutes and reverberates round and round the valley. One is just fading as the next starts.

I have good hearing. The noise is ruining my enjoyment of our once peaceful suburb. It is a significant change from what we are used to and what we would expect this far from the city and airport.

Faithfully yours,
Lynley Mason
