

There are over 100 peer reviewed scientific studies showing no developmental harm or psychological issues from being exposed to porn, yet you are trying to introduce facial recognition scans for us to be able to access pornography? and banning all fetish porn? Are you kidding me?

This is clearly a pack of Narcissists and Psychopaths trying to impose social dominance, and we are getting sick and tired of your corruption.

Just like FOSTA and SESTA drove tens of thousands of sex workers into the arms of sex traffickers, while pretending to protect them. Just like the number of sex workers driven into homelessness after being de-platformed by deranged, narcissistic individuals on a crusade to ban pornography, and limit access to it, despite having no scientific underpinning to your behavior what so ever, this policy is going to be beyond damaging.

This is the most corrupt government in all of Australian history.

If you want to protect our children from predators and bad influences, start by investing in vaccine for Narcissism and Psychopathy, then distribute it throughout the Senate and House, as we know you're just a pack of White Supremacists who hate bold, empowered women controlling their own sex. You can't stand the fact you don't control them, anymore.
