Online Safety (Basic Online Safety Expectations) Amendment Determination 2023

Online Safety (Basic Online Safety Expectations) Amendment Determination 2023

My Response:

As a response, I will speak on the topic as a whole.

I think, the entire proposal sections, could be implemented quite well. Since, many children are spending a large amount of time on the internet. Thus, children of a young age, plus older populations too, might succumb to things such as 'deep fakes' or misinformation, without much forethought or deeper thinking, this could lead to problems. Changing the nature of laws, to protect the service provided to children, shielding them from Child Sexually Exploitative Material, is a must, since the creation of deep fakes have surfaced, there is a higher chance of seeing that material, and other material that is more inclined to incite violence and spread hate, should be shielded from the children.
