

Submission to Fuel Efficiency Standard

These are our points in submitting to the proposed Fuel Efficiency Standard.

We would like to see legislation which:

- Delivers genuine reductions in emissions from new cars sold in Australia – avoiding credits and loopholes that undermine their effectiveness
- Is mandatory and legislated – auto manufacturers shouldn't be able to opt out
- Sets Australia on a strong pathway to a zero emissions fleet – with a target of all new vehicles sold being zero emissions by 2035 at the latest
- Aligns with other car markets like New Zealand, the United States and Europe as a minimum – so Australia moves up the queue for cleaner, cheaper vehicles
- Starts as soon as possible – every new vehicle sold today will likely be on the road for at least the next 10 years, so we cannot delay.

Please implement policy ASAP!

Sincerely,

Verrierdale Residents Group
