ACCC reports of vehicle safety issues due to cracked pistons in specified vehicles

September 2024

As part of its work administering the [Road Vehicle Standards \(RVS\) legislation](#), the Department of Infrastructure, Transport, Regional Development, Communications and the Arts (the Department) maintains databases of [reports](#) since 2016 submitted by members of the public, industry and other regulators regarding potential vehicle safety issues or alleged non-compliance with RVS legislation.

This document provides the number of such safety reports received by the Department from the Australian Competition & Consumer Commission (the ACCC), for the purpose of being recorded in the Department's databases, in relation to cracked pistons in specified vehicles.

Table 1: Number of reports from the ACCC, for recording in the Department's vehicle safety databases of potential vehicle safety issues, in relation to cracked pistons for the specified vehicle models manufactured between the years 2008 to 2024.

Model	Notifications Received
Toyota Land Cruiser Prado	0
