

Submission to Funding of universal telecommunications services

Name: We are not heard

Comment:

As a poor disabled pensioners living in rural Victoria Australia we are not able to access any services without a NBN connection or mobile phone. The coverage is very poor and random around the upper Goulburn valley. Mobile dropouts are common. In my local area all the banks have gone except Yea Bendigo bank. We have one overpriced supermarket so to get decent food we need to go online and order from Seymour. We need free NBN for all pension recipients as we are living like animals as we spend all our pension on food and electricity. A prison treats inmates to better services than we get. Lucky we have a local hospital to treat our ill.
