Proposed new mandatory minimum classifications for gambling-like content in computer games

Submitted by

Guru Dha

This submission does not go far. There is no room for: violence, sex, language, drug use and nudity under MA15. Social media and Apps are full of this content and promotes computer games. We should as society reduce the harm on future generations. We must have stronger regulation to reduce violence, sex, language, drug use and nudity as well gambling-like content in computer games.
