

Consultation Name: Updated fire control laws for Norfolk Island

Comment:

I agree with there being fire bans in time of drought or dry periods. I do not agree with having to have a permit to burn green waste and have it overseen by the fire control officer. The burning of green waste when clearing land or gardening is the traditional way of getting rid of it. I hope you're prepared for the enormous increase in green waste that Waste Management will have to deal with instead. They'll be overrun.

The last thing that Norfolk needs is more cost and bureaucracy...
