Please rank the proposed options in order of preference. (optional)	Option A - 3rd, Option B - 2nd, Option C - 1st
Briefly, what are your reasons for your choice? (optional, 3000 character limit)	The sooner we reduce transport emissions the better for the planet and our health. Health benefits listed above are probably understated as it is difficult to quantify the impact of exhaust fumes alone on inhabitants. This will be better understood once ICE vehicles are no longer the mainstream. Fuel benefits alone for Australia and individuals will help to significantly alleviate cost of living pressures. It's short term pain for medium term gain.
Do you support the Government's preferred option (Option B)? (optional)	No
Do you have any feedback on the analysis approach and key assumptions used? (optional, 3000 character limit)	NULL
Briefly, describe how the NVES might impact your organisation (optional, 3000 character limit)	Our organisation is already using electric vehicles and will continue to advocate for their increased uptake by spreading positive and accurate information about the benefits.
