# Caring for Country using the New Vehicle Efficiency Standard

**From 2025, the New Vehicle Efficiency Standard will apply to new cars being sold in Australia.**

A more fuel-efficient car saves drivers money on fuel and ensures more fuel-efficient, low and zero-emission vehicles will become available in the second-hand vehicle market over time.

- ✓ This only applies to new vehicles. You will not have to modify or change your existing car.
- ✓ Saves you fuel money at the bowser, particularly mob travelling long distances.
- ✓ More choice of new cars that are fuel-efficient, low or zero emissions when you go to buy a new car or upgrade your vehicle fleet.
- ✓ Reduction of transport emissions, improving the air that you and your mob breathe.
