

Australian Government

The Australian Government is introducing the **New Vehicle Efficiency Standard.**

From 2025, there will be more choice to buy new cars that are more fuel efficient with low or no emissions, that are better for the environment.

Cars make up about 60% of transport emissions in Australia

To meet emissions targets

Car manufacturers and suppliers will be encouraged to offer a wide range of

**fuel efficient,
low or no emissions
cars for sale.**

We can expect around

\$5 billion

in health cost savings by 2050.

Improving air quality

Reducing emissions means the quality of the air we breathe will improve.

Lowering emissions

Helping Australia reach 'net zero' goals.

We can expect around

321 million tonnes

of reduced emissions by 2050.
