

Australian Government

Department of Infrastructure,
Transport, Regional Development,
Communications and the Arts

The Australian Government is introducing the **New Vehicle Efficiency Standard**

From 2025, there will be more choice to buy new cars that are fuel efficient with low or no emissions, that are better for the environment.

Cars make up about 60% of transport emissions in Australia.

To meet 'emissions targets'

Car manufacturers and suppliers will be encouraged to offer a wide range of

**fuel efficient,
low or no
emissions
cars for sale.**

Improving air quality -
reducing emissions means
the quality of the air we
breathe will improve.

Lowering emissions

Helping Australia reach
'net zero' goals.

We can expect around

321 
million tonnes
of reduced emissions by 2050.

We can expect
around

**\$5
billion**

in health
cost savings
by 2050.
