

---

We had recently bought a townhouse at the above mentioned address. Unfortunately at the time we did not realise there's no cell signal in the area.

Discussions with Telstra has not resulted in any meaningful commitments to provide this area with reception.

It creates safety challenges for our families as the only way of making contact is through a wifi enabled smartphone. And most numbers aren't available for that purpose. The same applies to important text messages that aren't delivered.

Signal drops constantly driving from Holt to Civic. At the bend down towards Whitlam on William Hove I and under the bridges on Parkes Way in town.

Regards,  
Ru
