

---

Hi,

Just noticed there is a public consultation for the Kimberley on Monday 9th.

I live in Kununurra and will be working from Halls creek on Monday and ironically will not be able to attend online as I know the Halls Creek internet will not cope.

Connection, strength & speed is atrocious in this part of the world and I do hope the Regional Telecommunications review will lead to providing solutions to the third world telecommunication product we receive in the far north.
