

I wish to make a submission to the telecommunications review.

Why we pay full price on our monthly telstra plans but receive sub standard service continuously line drop outs bad signal and blackouts. We should only pay for what we use.

Also we live approx 50kms from Albury and yet have no or almost no mobile signal 50 kms. Because of our location we are forced to use satellite internet which is fine but why are we limited to 25mbps which works out at 15 to 18 mbps never 25mbps. Why Why Why

This is 2021 and we are putting up with 1990 technologies.

Colin Jones
