

To whom it may concern,

I live in Hamlyn Terrace, NSW, 2259, brand new development and one of the fastest growing areas on the coast, but I can't take work phone calls because the reception doesn't even get 4g unless I am outside of my house and then it is only 1 bar.

I am also with Telstra and pay extra purely to try and get the best of what little coverage we get.

For what I would say is a very populated area the reception is well below par.

Thank You

Chris Lee
