

I work as a real-estate professional in the North Burnett area I run my own business and sit on the local board for a local nursing home along with sitting on a board for another internet based group, I have moved from Sydney and lived in Brisbane and Melbourne.

The lack of consistency in our coverage impacts my day to day life it does not allow me to be efficient in communication to my customers I can spend hours a day traveling around the North Burnett I have a cellfi (range extender fitted to my vehicle however areas of service where a call can be held or understood are minimal resulting in lost business.

I have spoken to Telstra who in there wisdom decided to arrange a welfare check so police and ambulance were sent to my home address due to having very poor internet at home and poor internet was due to tower capacity with no solution to the issue.

My partner works for Garmin and produces all the training for Australia and NZ this is done from a farm house using 4g or 4gx not sure or tv is a smart tv because it too can run off the Night hawk device.

People are moving to regional Australia but at finding the lack of service 5 km out of town to be restrictive.

Regards
