

Belinda Stapleton

acacia hills.

Issues with telecommunications in rural NT:

I was not able to work during lockdown because not enough signal from phone hotspot.

So I was forced to take days of leave instead of being able to continue.

I have minimal service with booster and no service at all without it or when in lockdown I've been unable to work from home.

I don't get any useful services at home.

Sky mesh only runs minimal internet to send and receive emails. All services are very slow.
