

Dear Sir/Madam

Re: 2021 Regional Telecommunications Review

We have a Telstra Mobile Tower located at the Balmoral Recreation Centre. When first erected the signal missed the township as it was set too high, hence the signal had to be lowered.

This action weakened the signal for the rest of the area for example;

1. Balmoral Golf Club located 4 kms from the tower, signal strength 1 bar
2. Our property located on the northern boundary of the Southern Grampians Shire 9 kms from the tower we have to go outside of the house to obtain a 1 bar signal.

It would be much appreciated if a Telstra tower could be erected near Fulham, above the Glenelg River to serve the area north of Balmoral which includes the Kanagulk and Telangatuk area.
