

To whom it may concern,

My recommendations for this bill are to either:

- Remove *Section 9* in its entirety, or
- Update *Section 9, Division 10* so that the Commissioner **must** obtain and heed advice given by the board

If neither of these options are taken, then a single Commissioner will be given the power to moderate online content without oversight. And in a digitally connected world, the end result will be **a single** Commissioner making decisions on content that an entire Board was instituted to moderate.
