Please accept this as my submission in regards to this bill.

I do not agree with the aims or outcomes and believe it would work in similar ways to sesta/fosta. Being used to censor and control women's and marginalised groups voices, bodies and freedom of expression. I am UK based and gain much value from hearing the voices of Australian sex workers and the like. Their voices and accounts support, educate and create community. My worry is this bill, like sesta/fosta will operate predominantly to silence and censor. I strongly oppose the bill and it's over arching controls .

Thank you
