

Greetings,

I am writing today to submit a public submission regarding the Online Safety Bill 2020.

I fully understand and support the stated intention of this Bill, however, **I am deeply disturbed and concerned by provisions in Part 9**, which essentially gives the eSafety Commissioner unrestricted discretionary power to purge legal, safe, consensual, and harmless adult content from the internet.

Entire communities and small businesses are put at risk by this, and it threatens artistic expression and the adult entertainment economy.

This will do nothing to protect people as educational and safety information would be targeted too, thus making the internet LESS safe, not more.

Part 9 of this Bill **must** be removed if the government cares about small businesses and online safety.

Sincerely,
Thomas
