

1 The Secretary
2 Telecommunications Reform
3 Australian Government
4

5
6 Dear Madam / Sir,
7

8 The draft legislation and proposals completely miss the point.
9

10 The issue in Australia is that the competitive landscape is not in place to ensure
11 effective telecommunication competition across Australia.
12

13 Specifically, the woeful coverage of mobile and NBN services available to
14 EVERY Australian. There are huge pockets of blackspots even along major
15 roads. There are blackspots in Capital Cities, Regional and Rural areas and
16 remote areas that have population. The Sky Muster system is also not reliable.
17

18 The Blackspot program is a joke, too slow and too little impact.
19

20 The Government should own the mobile and NBN network, and make it available
21 to all telecommunications vendors, so all can compete.
22

23
24 **Start fixing this, before tinkering on more wasted projects.**
25

26 Please WAKE UP and quickly.
27
