Hello

Some years ago I imported a used vehicle from Japan under SEVS, it was a Mitsubishi Delica 2.8 Diesel and was in very good condition.

At that time it was possible to purchase vehicles 15+ years of age provided they were in very good condition and were brought to Australian standards prior to registration for road use, seatbelts, tyres etc.

Changes were made to this extending the limit from 15, to 16 etc ensuring the vehicles that applied in that category were older and older; basically this should not have happened because it caused the Australian fleet to age.

This rule should revert to 15 years or even 10 or 12 years. This will have no effect on home built vehicles.

For your consideration

Ted Witwicki
