

Caravan Council of Australia

Evaluation, Comparison, Contract & Inspection

Information when considering purchase of a new caravan, or camper-trailer:

You are making a *major* investment... Make sure you do *not* finish up with any regrets.

There are highly-professional, highly-respected Caravan manufacturers and dealers, who build and sell fully-compliant, high-quality Caravans.

There are also some people and products that are *not* of the same calibre.

Do *not* be pushed! Do *not* assume anything! Take your time to be *sure* you understand fully!

If in doubt, or if a sixth-sense tells you to... walk away.

Ensure you have at least a basic understanding of the *Australian Consumer Law*.

Remember: Sales personnel are trained to *sell*.

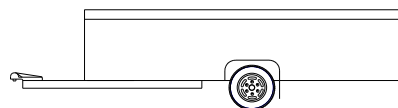

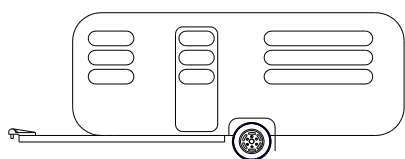

Do *not* rush. Take a respected independent person - who is experienced, especially with legal and technical requirements, in caravans - with you. They will be level-headed, with no emotional involvement in your new *pride-and-joy*, and able to ensure you make sound evaluations and decisions.

Confirm *all* items in the *Sales Contract* thoroughly. Do *not* accept anything that is *not* as you want.

Expect - *Demand* - the Dealer to take 4 - 6 hours to fully inspect, test and explain all items.

This document has **4 Parts**... In Order:

- 1: **Evaluation** - Considerations when Purchasing a new Caravan
Requirements & Preferences for a New Caravan
- 2: **Comparison** of Various Makes & Models (Use one sheet for each Caravan)
Judge with your Requirements & Preferences with Inspected Caravans
- 3: **Contract** - Items that *MUST* be included in the Sales Contract
- 4: **Pre-Delivery Inspection** - Items that *MUST* be Inspected & Accepted before taking Delivery

Product warranties *must now* include, word for word, the following statement:

"Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure."

Ensure all requirements are *clearly stated in writing* and signed by yourself and the Dealer.

Does the manufacturer have a recognised professional *Quality Assurance* program in place:
Water-leakage test to be conducted.
Acceptance *must* be declined if the handling is *not* considered satisfactory.

Certificates: Licensed Gas-fitter
Licensed Electrician
Licensed Plumber
Weigh-bridge (certified or Declaration)

Declaration: **“The vehicle fully complies with all VSB-1 legal requirements”.**

Items that **MUST** be Inspected - & Accepted - before taking Delivery:

You are making a *major* investment... Make sure you do *not* finish up with any regrets.

Expect - *Demand* - the Dealer to take 4 - 6 hours to fully inspect, test and explain all items.

Do *not* be pushed! Do *not* assume anything! Take your time to be *sure* you understand fully!

Ensure you have at least a basic understanding of the *Australian Consumer Law*.

The Dealer has significant "*Duty of Care*" responsibilities.

The caravan *must* be of "*Acceptable Quality*" and "*Fit For Purchase*".

Confirm *all* items in the *Contract* thoroughly. Do *not* accept anything that is not as you want.

Ensure professional detailed *Handbooks* are provided for all appliances and systems.

The Dealer *must* provide you with "all information that you may reasonably be expected to know".

Test *all* appliances and systems properly... on gas, 230 volt AC, and 12 volt DC. Don't rush!

Allow sufficient time to ensure everything works correctly.

Inspect wiring size (gauge) and type of connectors.

Check dc voltage available at appliances.

Inspect *all* exterior and interior surfaces for damage or imperfections.

Inspect *underneath*, for damage or unprofessional wiring and tubing/hoses.

Inspect *all* doors for correct and neat fitment, and operation of latches and locks.

Check all windows.

Inspect *all* upholstery, fly-screens and soft surfaces for any damage.

Check the awning for correct and easy operation.

Fill the water tank(s) using a hose at full tap pressure. Check all lines and connections for leaks.

Check water pumps for correct operation.

Flush the toilet a few times. Is the cassette easy to remove and install?

Conduct a reasonable water-leakage test with a hose, to simulate a heavy rain-fall on the roof and windows, and inspect inside for any water leaks. Declined acceptance if there are leaks.

Connect the combination. Are the vehicles level? Are the safety-chains, jockey-wheel and coupling working properly?

Check all lamps for correct operation.

Check the brake break-away system for correct operation.

Is a battery-condition warning device required for your state/territory?

Does the jack work correctly? Are there prescribed jacking-points on each side?

Ensure you have insurance for the new purchase.

With the Dealer on board, test-drive the vehicle combination at reasonable speeds on various roads, to ensure handling and stability seem OK.

Ensure the brakes are working correctly.

Thoroughly inspect the *Sales Contract* and other documentation supplied by the Dealer. If you have any reservations on any item, do *not* sign anything, but have a solicitor inspect the document. Decline acceptance if this is refused by the Dealer.

Ensure you understand all conditions regarding operating your purchase, especially those relating to servicing/maintenance.

Are there any special limitations on what road surfaces you can drive on, or operate appliances for continuous periods, etc.?
